## Recipe Management: Linking Recipes

---

To link a recipe to a another recipe (typically a variation of the original recipe), go to the Links menu from the editor.

1. From the drop down menu, select the recipe that you want to link to.
2. From the images drop down menu, select the image that you want to use as a button to the linked recipe. You must load all images that you want to use for linked recipes into the media library before they will be available in the drop down menu. For more information on the Media Library, [click here](#).
3. Save your changes when you have completed adding links.
