Security: Configure User Accounts: Enable Users

[Previous](#) | [Next](#)

Note: To edit any user account information, permission to View Users must be checked.

To Enable a user you must be a global admin or have permission to both:

- View Users
 - Disable Users
1. Log in to the Desktop application with administrative privileges.
 2. Under the Admin tab, click User Accounts.
 3. Highlight the appropriate user.
 4. Click the Enable button.
