Recipe Web Portal > Recipe Portal Display

Portal Display and Navigation

The Portal site is designed for simple touch navigation. Large buttons and icons make it easy for users to quickly access new recipes and recall previously used recipes.

Recipe Group Buttons

The buttons that run along top of the recipe portal are Recipe Groups. Each tab on the portal can have a recipe viewer module on it. Each recipe viewer module can have up to ten groups (or buttons) along the top. Clicking a Recipe Group button will open a list of the recipes that are in that group. Each recipe will be a button.

Navigation Icons

Once a recipe is clicked, there are a series of icons that appear on the bottom of the display. These buttons navigate users through the recipe portal.

In the image below, there are four icons.

- Home
- Recipe Card
- History
- Multimedia

Home Icon

The home icon appears inside of every recipe. When a user touches the Home icon, the recipe portal will go back to the Group home. For instance, if a user opened the Appetizer Group, and then clicked on a recipe for "Nachos", the Home icon would take the user back to all the recipes in the Appetizer Group.

Recipe Card Icon

The recipe card Icon will take the user back to the actual recipe. From a recipe, users may click multimedia buttons that can navigate them to a picture or a video. To quickly get back to the recipe that they were in, they would click the Recipe Card Icon.

History Icon

This history icon will take the user to a window displaying previously access recipes.

Multimedia Icon

The multimedia icon will take the user to a window displaying pictures and other media that are associated to the recipe.
