Portal Modules: Announcements

Announcements Module

This module renders a list of announcements. Each announcement includes title, text and a "read more" link, and can be set to automatically expire after a particular date. Announcements includes an edit page, which allows authorized users to edit the data stored in the SQL database.

Example

Announcement Details

Title:	<input type="text" value="Recipe Publishing System Launched"/>
Read More Link:	<input type="text" value="Read More"/>
Read More (Mobile):	<input type="text"/>
Description:	<div><div>The Recipe Publishing System has been launched.</div><div></div></div>
Expires:	<input type="text" value="12/31/2005"/>
