Part 3: Recipe Editor Installation

[Previous](#) | [Next](#)

Recipe Editor Installation

If you checked the option to install the Recipe Editor, a setup program will launch after the portal and databases are installed. To continue with the editor installation, follow these steps:

1. Click Install.

2. You will be prompted to enter a software key to activate the system. You can contact your sales person or project manager if you do not have a key.
3. From the Recipe System login screen, click **Setup**. You will need to setup the connection to the SQL database.
