Portal Modules: Quick Links

Quick Links Module

Like Links, this module displays a list of hyperlinks. Rather than displaying it's title bar, however, QuickLinks shows the title **Quick Launch**. It's compact rendering and generic title make it ideal for a set of **global** links that can appear on several tabs in the portal. The edit page allows authorized users to edit the QuickLinks data stored in the SQL database.

Example

Link Details	
Title:	<input type="text" value="Sysco Foods"/>
Url:	<input type="text" value="http://www.sysco.com"/>
Mobile Url:	<input type="text"/>
Description:	<input type="text" value="Sysco Foods"/>
View Order:	<input type="text" value="1"/>
Update Cancel Delete this item
