Portal Modules: Contacts

Contacts Module

This module renders contact information for a group of people, for example a project team. Contacts includes an edit page, which allows authorized users to edit the Contacts data stored in the SQL database.

Example

Contact Details

Name:	<input type="text" value="CBS Help Desk"/>
Role:	<input type="text"/>
Email:	<input type="text" value="support@cbs-posi.com"/>
Contact1:	<input type="text" value="1-800-551-POSI ext 1"/>
Contact2:	<input type="text"/>
