Report Number 39

Printed : 04/22/2014 16:44:15

Date:	04/09/2014 15:32	Product:	(No Product Entered)
Exe Version	CHKTODBF	Number:	5253
Solution:	New CHKTODBF.EXE with new MISCMEMO.DBF.		

Memo Types

FISCAL - Fiscal check number and text
ATOMIC - Atomic transaction memo
ACCOUNT - Unused Club account record
TEAM - Team member listing
GIFTCERT - Gift certificate redeemed
LOYALTY - Loyalty card number
MAGCARD - Magcard message response
DISCOUNT - Discount memo
MEMO - Memos saved in checkfile
POINTS - Points
COMPCARD - Comp Card memo

Date:	03/31/2014 15:13	Product:	(No Product Entered)
Exe Version	BOSETUPW.exe	Number:	5240
Solution:	New option: Store loyalty card in check file.		

Date:	03/26/2014 17:55	Product:	(No Product Entered)
Exe Version	Bosetupw	Number:	5239
Solution:	New Option: Store non-payment memos as misc. memos in the check file. Setup > Rest Misc Data > System 1 > More		

Date:	03/26/2014 13:34	Product:	(No Product Entered)
Exe Version	BOSETUPW.exe	Number:	5238
Solution:	New options: Setup > Discounts and Coupons > Allow modifiers on coupons? Setup > Credit Cards > Merchant Data > More 2 > CC Auth wait for all authorizations? - forces the system to wait for an authorization before proceeding to the next card to be approved. For split payments, when using branded gift cards, the amount being authorized may not be what is actually approved. This option forces the system to wait for the actual approval of the partial authorization before allowing the next card to be swiped. See SPCWIN update documentation for date of implementation.		

Date:	02/19/2014 09:52	Product:	(No Product Entered)
Exe Version	BOSETUPW.exe	Number:	5205
Solution:	Added new User Privilege: "169-No Payout Gratuities" Check SPCWIN updates for actual date of implementation.

Report Number 39

Printed : 04/22/2014 16:44:15

Date: 02/13/2014 08:48 **Product:** (No Product Entered)
Exe Version QuickMenu **Number:** 5199
Solution: E
BLUE Release 2.4.1.15 (2/12/14)

1. Improvements for upgrading older databases.
2. The edit control type drop down box can duplicate entries under certain conditions
3. Improvements for setting the deployment location.
4. In some cases, Local store/concept configurations are not updated as part of the export/import process.

Date: 02/12/2014 17:29 **Product:** (No Product Entered)
Exe Version INVDBFW **Number:** 5190
Solution: Fixed an issue where some sites may not have ACCT_NUM in the Ingrid.dbf file.

Date: 01/31/2014 10:35 **Product:** (No Product Entered)
Exe Version SENightly **Number:** 5181
Solution: SENightly Improvements
Release 1.1.0 (1/31/14)

1. Nightly: Added configuration, "OutputFilename", which contains the output file name for the Nightly XML data. The default is "SEnightly". ".XML" is concatenated to the end of the file name if needed.
2. Nightly: Added configuration, "ClearOutputDirectory", which when set to "True", causes the output folder for the Nightly file to be cleared before generating the new Nightly file. The default is "False".
3. Nightly: Added configuration, "AppendStore", which when set to "True", prepends the 4 digit store number to the Nightly file name. The default is "False".
4. Nightly: Added configuration, "AppendDate", which when set to "True", prepends the transaction date to the Nightly file name. The default is "False". If both "AppendStore" and "AppendDate" are set to "True", the date precedes the store number. Format: "yymmddXXXXSEnightly.XML".

Date: 01/24/2014 17:39 **Product:** (No Product Entered)
Exe Version Menuw.exe **Number:** 5179
Solution: For Cell Type 15 - Timed Item, added new option in MORE fields > Tax Included?

Date: 01/21/2014 10:02 **Product:** (No Product Entered)
Exe Version Menuw.exe **Number:** 5175
Solution: For cell type 12 cells, relabel the Reorder flag as "No exclude from coup value"

Date: 01/10/2014 15:25 **Product:** (No Product Entered)
Exe Version QuickMenu 2.4.1.13 **Number:** 5169
Solution:

1. Fixed: Deletions: When deleting a modifier template at corporate, the deletion information isn't making it into the export/import set
2. Field Filters: The caption for the Field Filters screen should read, "Select Properties Exported for this Manifest".

Date: 01/09/2014 16:21 **Product:** (No Product Entered)

Exe Version QuickMenu 2.4.1.12 **Number:** 5168

Solution: BLUE Release 2.4.1.12 (1/9/14)

1. Modifier Preview: Fixed: While editing a modifier that contains modifier groups, you are no longer able to select or move a modifier.
2. Import/Restore: Improved: If you do a "Restore" immediately following an "Import", issues with the screens may be seen.
3. Temporary Data: When a concept/store creates a record in support mode, flag the record as temporary by creating a new record in QMtempData.XML. When importing, delete all temporary data first.

Date: 01/06/2014 18:38 **Product:** (No Product Entered)

Exe Version TAW **Number:** 5165

Solution: Improved logic for employees that may have more than 30 jobs.

Date: 01/06/2014 14:33 **Product:** (No Product Entered)

Exe Version BOSETUPW **Number:** 5163

Solution: New Option:
Added new flag in Setup->RMD->System 3:
"Create POSiPortal File?"

Creates the POSiPortal data file.

Date: 12/27/2013 11:21 **Product:** (No Product Entered)

Exe Version TAXML **Number:** 5161

Solution: Improved logic for importing CSV files. In some situations, an employee's job was not being imported based on the job name in the CSV file.

Date: 12/26/2013 18:12 **Product:** (No Product Entered)

Exe Version QuickMenu Release 2.4.1.9 **Number:** 5159

- Solution:**
1. Export/Import: Updated so that all menu items, cell templates, group templates, and modifier templates are always exported/imported.
 2. Menu Item Slide-out: When restoring the database results in a change to whether menu item numbers are displayed in the slide-out or not, the list headers can get displayed incorrectly.
 3. Export/Import: Deleting a number of menu items, followed by an immediate re-import of some of the same data items, results in exceptions and data corruption.

Date: 12/09/2013 19:36 **Product:** (No Product Entered)

Exe Version QuickMenu Release 2.4.1.6 **Number:** 5142

- Solution:**
1. Some users may encounter an exception when compacting the database.
 2. When exporting, users are no longer prompted to choose IMPORT into the test database on their system.

Date: 12/06/2013 17:37 **Product:** (No Product Entered)

Exe Version QuickMenu 2.4.1.4 **Number:** 5137

Solution:
BLUE Release 2.4.1.4 (12/6/13)

1. Improved Export/Import Processes. Removed unneeded processes.
2. Deletions: No longer creating deletion records for data that was never modified. During an import, new menu items would be added for new cells, but then immediately deleted because the cell is already connected to an existing menu item.
3. Location Configuration: When "Corporate/Master" is selected, the location type is automatically set to "Corporate" and is read-only.
4. Concepts/Stores Editor: When a master database concept is selected, hide the concept/store groups section.

Date: 12/04/2013 15:42 **Product:** (No Product Entered)

Exe Version PSNEWW and BOSETUPW **Number:** 5133

Solution:
PSNEWW and BOSETUPW

Setup > payment > sales journal > sales journal options > standard options > Eliminate Server Sales and Tip Report

PSNEWW
The Server Sales & Tips report option will no longer be visible.

Date: 12/04/2013 15:42 **Product:** (No Product Entered)

Exe Version POSIDBFW.exe **Number:** 5125

Solution:
11/27/13
Improvement to logic of calculating CHECKS in HRSALES.DBF when considering overring checks

08/16/13
Increase the width of COVERS field to #####.## in CHKITEMS.DBF.

02/13/13
Fix for cover counts when doing overrings in HRSALES.DBF, SALES.DBF and SHFTSLS.DBF.

Date: 12/04/2013 15:42 **Product:** (No Product Entered)

Exe Version INVDBFW.exe **Number:** 5124

Solution:
INVDBFW

09/11/13
Added command parameter "INGREDCSV" and "CATEGORYSCV" to create INGRED.CSV and CATEGORY.CSV files.

Date: 12/04/2013 15:42 **Product:** (No Product Entered)

Exe Version MENUW.exe **Number:** 5129

Solution:
01/25/13
Fix for not allowing to add new ingredient when using QM.
