Report Number 39

Exe Version	6.41 and Security.exe	Date:	12/31/2018 12:03			
Number:	5995					
Solution:	1. Fixed an issue with the server name	e on VDUs when repeating an ord	er			
	2. Fixed an issue with bumping an unpaid order on the Show Orders screen					
	Security.EXE 1. Added new tags to security.xml					
	2. Fix for handling low resolution scree	ens. The Security.EXE screen nov	v can scroll to see the entire screen.			
	3. Date/Time/size of the security.exe a	are determined directly from the e	xe and not when the exe was copied on the machine			
Exe Version	6.41	Date:	12/31/2018 12:03			
Number:	5994					
Solution:	1. Improved logic for tip adjustments	when using Multiple MIDs.				
	2. The first part of the flag "Add Sugged default action for all EMV configuration					
	3. Fix for the logic of using gift certificates for advanced deposits with credit card split payment and Edit Tips on payment flag.					
	4. Improvements for sites using very old hardware keys. Some sites report SPCWIN may hang at startup.					
Exe Version	6.41.0	Date:	11/13/2018 16:20			
Number:	5989					
Solution:	1. Improvements to the math used wh	en an Open Dollar Discount is ap	plied and Service Charges are also on the check.			
	Improvements for sites using Bar Codes on a Fast Order screen, and changes to the screen layout switch the terminal to a regular order screen.					
	Some sites may report an issue with hourly sales reporting on the front of the house cashout following an Immediate System Change.					
	4. Improvements for Number in Party set from Seats.					
	5. Improvements for Multiple Merchant IDs and POSiPAY. All secondary transactions will use the original Merchant ID, even if the secondary transaction is performed at another terminal with a different Merchant ID.					
Exe Version	6.41.0 Spanish	Date:	10/26/2018 16:26			
Number:	5982					
Solution:	Spanish SPCWIN					
Exe Version	6.41.0	Date:	10/25/2018 09:45			
Number:	5981					
Solution:	Improvements for Shift4 TID field that will be only applied under S4 flag and only for CC channel 1. The bug affected the PosiPay sites with this S4 TID field and Paytronix running on CC Channel 2. In some cases the Paytronix message may appear on the wrong terminal when using the S4 TID field in setup > hardware > terminal stations.					
Exe Version	6.41.0	Date:	10/24/2018 12:09			
Number:	5980					
Solution:	New feature to allow sequential menu	w style sets with QM.

02/01/2018 - 02/28/2019

Exe Version	6.41.0	Date:	06/20/2018 18:57				
Number:	5950						
Solution:	 Repeat does split with quantities. Added global flag for this feature. To have the repeat button split off items ordered with quantity you need: a. Global mixed mod flag b. New flag for this feature 						
	c.Item in question needs cell mixed mod flag						
	2. Improvements for drive mirro	ring when the backup machine is a Windo	ws 10 machine.				
		when the first six digits of the bin range are an activated on the processor side).	e not returned in an authorization. (i.e For sites where				
Exe Version	6.41.0	Date:	06/11/2018 15:03				
Number:	5946						
Solution:	1, Improvements: SPCWIN will back up the punch file every 10 minutes and when SPCWIN starts. Similar to the check file copies. Punch2.T00 through Punch2.T99 and Punch2.P00 through Punch2.P99. While the spcwin is running in the backup mode, it will make the copies Punch2.R00 through Punch2.R99						
	2. License related enhancements:						
	 Allow one day key override -supercedes any license errors and a demo mode 						
	 Overrides "Do not allow to run system in DEMO mode if the license is not valid (expired, corrupted, etc)". 						
	 Extend validation window for license error 4 (PC signature mismatch) from one day to five days. This will give support extra days to resolve this type of license error caused by some posdrvr hardware changes. The security.exe will reflect the end of 5 day validation window in the "valid until" display and in the <valid> tag of security.xml.</valid> 						
	 Added support for "Seasonal" sites. Current PosiKey recently added "Seasonal" setting. If a site is marked as "Seasonal", online reporting for being offline will be increased to 30 days, versus the current two days. 						
Exe Version	6.41.0	Date:	06/06/2018 09:03				
Number:	5942						
Solution:	1. Improvements for open dolla	r discounts and application of multiple taxe	9S.				
	2. Improvements for XML Ordering, PLU and Specials price overrids.						
	3. Improvements for option routing when using XML ordering.						
	4. OOS Groups. Adds an OOSGroupQuantity tag to oos xml file for items that have quantity 888 which means they are part of a group.						
	5. Fixed an issue with the Sugg	est Gratuity option not working.					
	6. Improvements for the option	"Suggested Gratuity on CC Slips, only if fu	III amount"				
	7. POSiPAY related improveme	ents from all previous versions.					
	8. Improvements and new optic	ons for updating open checks via XML. New	v backoffice setting "Allows Allow".				
	9. Added visual highlighting to t	he CC REMOTE button on the left of the C	CC AUTH screen. The button will now be 'highlighted' if the				
	user arrives on the CC AUTH screen by touching the REMOTE button on the payment screen.

Report Number 39

Exe Version	6.41.0	Date:	05/10/2018 14:56		
Number:	5939				
Solution:	1. For use with POSiPAY and other 3rd party programs using Transerv Channels. POSiPAY must be transerv channel 1.				
	2. Improvements for snapshot check to	otal line.			
Exe Version	6.41.0	Date:	05/03/2018 13:32		
Number:	5936				
Solution:	1. Improvements for Exception handling	g and XML ordering.			
	2. SPCWIN will now reject XML orders	with ItemNumber 65000 and la	ırger.		
	3. Improvements for dupe only if routed	d to option			
Exe Version	6.41.0	Date:	04/29/2018 18:39		
Number:	5934				
Solution:	1. Improvements for sites using POSiCloud and having a large number of closed checks at the end of the day.				
	2. Fixed an issue where the NRT number may be read as zero (0).				
	3. New ability: Add the line into the spcwin.ini CFAccessLog=YES to log in the error.lst the list of the third part EXEs that prevent the spcwin from opening a check file. This line makes this feature optional instead of the default in the previous spcwin releases.				
	4. Improvements for the quantity tag for modifiers and banquet modifiers.				
	5. Improvements for XML out of stock reporting.				
	6. Fixed an issue where rear facing displays may not display correctly.				
	7. Improvements for user priv 122 - no cashout printout,and the PosiCloud file output.				
	8. Improvements for deleted cell type 27 memos excluded from checkfile.				
Exe Version	6.41.00	Date:	04/23/2018 20:15		
Number:	5933				
Solution:	1. improvements for multipliers in XML, cloud API. Not yet released.				
	2. Added logic to allow 3rd party EMV responses to reply with XXXXXX or xxxxxx in the cc auth reply. Previously only xxxxxx was permitted.				
	3. POSiPAY improvements for long res	sponses.			
Exe Version	6.41.0	Date:	04/20/2018 12:22		
Number:	5932				
Solution:	1. Improvements in software license re	gistration and HW key manage	ment.		
	Fix for handling suggested (applied) gratuity in case of limited balance gift cards/branded credit cards when processed remotely (EMV) and processed in SPCWIN as the pseudo debit mode.

Exe Version	6.41.0	Date:	02/07/2018 18:18		

Exe Version6.41.0Date:02/07/2018 18:18Number:5908Solution:Improved logic for AMEX transctions done via EMV. In some cases, the middleware may not return the expected number of digits
when using an AMEX card. (The card number is masked when sent to POSitouch).
When using the REPEAT option on the CC AUTH screen, the amount may be incorrect - reflecting only the outstanding balance of
the check and not the new total of the check.

SPCWIN UPDATES BY DATE

02/01/2018 - 02/28/2019

Report Number 39

Exe Version	6.41.0	Date:	02/05/2018 15:58			
Number:	5907					
Solution:	1. Fixed an issue with SPCWIN version 6.41.0 from 11/28/17, where, after an immediate system change, the wrong user may be displayed when another user logs into the system.					
	if a "NEW" or "UPDATE ORDER" is received via XM	AXML Ordering improvements. In some cases, when an item is listed under Out of Stock and specials, DATE ORDER" is received via XML Ordering, and the order fails, the item's count is reduced by one and not unce order (Function 1, ErrorLevel 1) had the same effect, lowering the count of the item, incorrectly.				
	3. Enforce the user privilege "Access Others' Tables"	" on Table View.				
	 Improved XML Ordering and <itemname> tag, using inventory description. Added logic to apply to modifiers, as well as items.</itemname> 					
	 5. Improvements for XML Services and messages (where a large red box appears wth a message). In some cases, the popup message may be behind standard POSitouch messages, causing POSiterm to stop resp the user cannot confirm the popup message. 6. Improvements for Start Tab and EMV. Previously, users had to wait to ring in items until the preauth amount was order for the name on the card to be captured. 					
	7. Improvements for Prep Sequence name on View/I	Edit.				
	8. Improvements for Check CVV and CVV Length w	nen used in conjunction	with gift cards.			
	ation Required? > If Over: s approval.					
	10. Housekeeping improvements.
