SPCWIN UPDATES BY DATE

04/01/2013 - 04/30/2014

Report Number 39

Printed : 04/22/2014 16:31:14

Date: 04/14/2014 16:39

Exe Version 6.40/5.40

Number: 5259

- Solution:**
1. Fix for Loyalty lookup causing intermittent lockups of Lookup transaction processing.
 2. Improvements to disable a PaymentType tag when it comes with a CardPayment block to prevent PaymentType tag value to overwrite a payment type deriving from a card defined in CardPayment block.
 3. In some scenarios, where a check has been separated, but not yet printed, submission of an XML order may fail. Improvements allow the XML order application to the separated, yet not printed, check(s).
 4. Fix for REMOTE CC auth screen where keypad prompt displayed "LOYALTY AMT" instead of "AMT".
 5. Improvements to the screen layout on the CC AUTH screen for eGiftCards.
 6. New flag "All CC AUTHs wait for response". With this flag spcwin regardless of other CC flags will always display "Waiting." popup and when authorization comes back and total of all authorizations on this check are smaller than total check amount, spcwin will stay on CC auth screen to be ready for another authorization. All numbers displayed on CC auth screen after authorization comes back will be actual numbers that middleware approves. This also applies to Gift cards and Branded gift cards with limited balance. If total of all authorizations on this check becomes equal to total check amount, spcwin will jump to screens based on other CC flags as it does now w/o this new flag.
 7. Implements user privilege 170 for Teams.

Date: 04/14/2014 13:57

Exe Version

Number: 5258

- Solution:**
1. New flag Credit Cards > Merchant Data > More 2 > CC Auth waits for all authorizations. With this flag spcwin regardless of other CC flags will always display "Waiting." popup and when authorization comes back and total of all authorizations on this check is smaller than total check amount, spcwin will stay on CC auth screen to be ready for another authorization. All numbers displayed on CC auth screen after authorization comes back will be actual numbers that middleware approves. This also applies to Gift cards and Branded gift cards with limited balance. If total of all authorizations on this check becomes equal to total check amount, spcwin will jump to screens based on other CC flags as it does now w/o this new flag.
 2. POSiPortal improvements.
 3. New: Hourly Sales section for POSiPortal
 4. Improvemtns for set modifiers and memos that are entered just before using a set modifier.
 5. QuickMenu and sets improvements.
 6. Improved VDU time reset and overdue notices
 7. Fix for "check paid" issue with show orders. Some sites have reports a black bar covering the PAY button on the SHOW ORDERS screen when paying out a check.

04/01/2013 - 04/30/2014

Report Number 39

Printed : 04/22/2014 16:31:14

Date: 04/04/2014 11:57

Exe Version 6.40/5.40 **Number:** 5250

Solution:

1. Improvements for number of check copies being set to greater than 1 and KVDU displays.
2. Some fast order sites may report a black bar appearing on the show orders screen on top of the PAY button.
3. Adjust payments improvements.
4. New functionality relating to POSiPortal
5. improved reporting for hourly sales in POSiPortal
6. Tax Included Subtotal improvements when printing.
7. Improved logic for using set modifiers and memos - where memos are entered just before the set modifier.
8. Improved performance for QuickMenu and Sets.
9. VDU time reset and overdue time improvements.
10. Improvements for Out of Stock and XML ordering. If an XML order fails, or is canceled or deleted, Out of Stock items that were ordered are added back into stock.
11. Improvements for responses to adding loyalty points, when the middleware returns a custom text of "^" in the response.

Date: 04/03/2014 15:24

Exe Version 6.40/5.40 **Number:** 5248

Solution:

1. Improvements for number of check copies being set to greater than 1 and KVDU displays.
2. Some fast order sites may report a black bar appearing on the show orders screen on top of the PAY button.
3. Adjust payments improvements.
4. New functionality relating to POSiPortal
5. improved reporting for hourly sales in POSiPortal
6. Tax Included Subtotal improvements when printing.

04/01/2013 - 04/30/2014

Report Number 39

Printed : 04/22/2014 16:31:14

Date: 03/26/2014 10:07

Exe Version 6.40 French **Number:** 5235

Solution: Improvements for the split check option (/2, /3) on the CC AUTH screen with remote processing.

Date: 03/20/2014 13:38

Exe Version 6.36/5.36 **Number:** 5232

Solution:

1. Improvements for Out of Stock and modifiers.
2. Improvements for time clock and rounding of punches.
3. Improvements for VDU/Show Orders display and having multiple check copies set to greater than 1.
4. Improvements for sites with settings for more that 1 check copy.
5. Improved user interface interaction when receiving a 250 response for Add Loyalty Points with a special character of "^" in the response.

Date: 03/18/2014 18:10

Exe Version 6.40/5.40 **Number:** 5231

Solution: Added functionality:
~&GENERATE_CODE5 feature

Date: 03/18/2014 15:34

Exe Version 6.40/5.40 **Number:** 5229

Solution:

1. Improvements to new features for TenderRetail.
2. Improved logic for XML ordering & VDUs with the number of check copies configured to greater than 1.
3. Improvements for time clock and punch rounding functionality.

Date: 03/13/2014 11:13

Exe Version 6.40 **Number:** 5228

Solution:

1. Implementation of the backoffice flag for employees, "No overtime exceptions". Employees with this option are left out of the 5 Weekly and 2 Daily overtime alerts.
2. Improvemets for out of stock modifiers.
3. Fixed an issue with a discount may not appear if Payment > Payment Systems Options 1 > Forced Memo on Discount.
4. Implementation of the eCard/eGift Card feature.

Date: 03/11/2014 16:38

Exe Version 6.36/5.36 **Number:** 5227

Solution:

1. Improvements for XML ordering when the number of check copies to print is greater than 1.
2. Improvements for printing of checks with tax included sales.
3. Improvements for paging on bump.

Date: 03/07/2014 19:05

Exe Version 6.37/5.37 **Number:** 5224

Solution:

1. QuickUpdate improvements.
2. Improvements for overrings with older middleware versions that may not handle reference numbers.

Date: 03/07/2014 18:59

Exe Version 6.40/5.40 **Number:** 5223

Solution:

1. Added logic for Pay with Club Account feature.
2. QuickUpdate improvements.
3. Improved logic for extended routing tables.
4. QuickUpdate and VDU improvements.
5. Improvements for multiple tip pool summary sections on the cashout reports.
6. Improvements for the View/Edit screen.
7. Improvements for printing checks with tax included sales.
8. Increased the size of numbers on some screens for better viewing. Requires new UIDB.
9. Improvements for overrings with older middleware versions that may not handle reference numbers.

Date: 03/05/2014 17:54

Exe Version POSITERM **Number:** 5222

Solution: Improvements for old style KVDU screens and displaying the EXIT button on POSiterm.

Date: 03/04/2014 14:26

Exe Version 6.37/5.37 **Number:** 5221

Solution:

1. QuickUpdate improvements
2. Improvements for cashouts with multiple tip pool summary sections.
3. Improvements for the View/Edit screen.
4. Improvements for printing checks with tax included sales.

Date: 03/03/2014 16:08

Exe Version 6.37/5.37 **Number:** 5220

Solution:

1. Some sites have reported issues with coin dispensers not dispensing.
2. Improved handling for malformed XML ordering files that may contain a check number of zero.

Date: 02/27/2014 15:36

Exe Version 6.37/5.37 **Number:** 5217

Solution: Added functionality or eGift Cards.

SPCWIN UPDATES BY DATE

04/01/2013 - 04/30/2014

Report Number 39

Printed : 04/22/2014 16:31:14

Date: 02/26/2014 15:51
Exe Version 6.37/5.37 **Number:** 5216
Solution:
1. New Functionality: eCards - added to ability to prefix a card number with a single button - used for eGift Cards that may be printed via an email or other marketing.
2. Improvements for gift card activations.
3. Improvements for loading jobs in the front of the house when a large number of jobs may exist for a staff member.

Date: 02/25/2014 11:35
Exe Version 6.37/5.37 **Number:** 5215
Solution:
1. Improvements for printing a sub total line when the guest check amount is greater than \$10,000.00
2. Improvements for QuickUpdate and kitchen VDUs.
3. Improvements for paging when an order is bumped.

Date: 02/25/2014 11:35
Exe Version 6.37/5.37 **Number:** 5214
Solution:
Fixes for card processing and reference number fields i and j and transaction sub-type field q.

Date: 02/21/2014 11:06
Exe Version 6.37/5.37 **Number:** 5213
Solution:
In some cases fields i and j may be incorrect in the credit card request causing the middleware to return an error.

Date: 02/20/2014 19:45
Exe Version 6.40/5.40 **Number:** 5212
Solution:
Improvements for new card processing network in Canada.

Date: 02/19/2014 09:52
Exe Version 6.37/5.37 **Number:** 5204
Solution:
Improvements for loading the teams.sys file.

Date: 02/19/2014 09:52
Exe Version 6.37/5.37 **Number:** 5206
Solution:
Some sites may encounter a malfunction when ordering via xml with <Function> less than 4.

Date: 02/14/2014 14:59
Exe Version 6.37/5.37 **Number:** 5203
Solution:
1. Improvements for quick update
2. Fixed an issue where under some circumstances, the pole displays will not show a menu item. Camera systems connected to pole displays may not show the menu item as well.

Date: 12/30/2013 13:35

Exe Version 6.36.2/5.36.2 **Number:** 5162

Solution:

New spcwin.ini line:
NoReboot=YES

This line will prevent SPCWIN from restarting automatically if an issue with Windows 7 is encountered. A person will have to manually restart SPCWIN in this circumstance.

Date: 12/20/2013 09:25

Exe Version 6.36.2/5.36.2 **Number:** 5155

Solution:

Additional logic for "multi-threading by channel" configuration when if one of the channels goes offline, other channels may stop sending transactions also.

Date: 12/20/2013 09:17

Exe Version 6.36/5.36 **Number:** 5154

Solution:

Additional logic for "multi-threading by channel" configuration when if one of the channels goes offline, other channels may stop sending transactions also.

Date: 12/19/2013 13:50

Exe Version 6.38/5.38 **Number:** 5151

Solution:

1. Improved logic for Prep Order XML files where a second prep order xml may be created when users Select/Deselect items on the View/Edit screen. Additionally improved the naming of the files to ensure the file name is incremented by 1.
2. Improvements for remote processing and overrings.
3. Improvements for overrings and credit card "repeat" option.

Date: 12/19/2013 08:52

Exe Version 6.38/5.38 **Number:** 5153

Solution:

1. Improvements for multi threading by channel sites. Improved logic ensures that if one channel goes offline, the additional channels remain active.

04/01/2013 - 04/30/2014

Printed : 04/22/2014 16:31:14

Date: 12/19/2013 08:52

Exe Version 6.37/5.37 **Number:** 5152

Solution:

1. Improvements for multi threading by channel sites. Improved logic ensures that if one channel goes offline, the additional channels remain active.
2. Some sites have reported system restarts when the combination of options, "Proceed to Payment" and user privilege 42 "Cannot send on separate check" are in use.
3. Improvements for Stay in System.
4. Improvements for copying user terminal assignments from one terminal to another from the manager screen.
5. General improvements for conversational ordering.

Date: 12/11/2013 17:42

Exe Version 6.36/5.36 **Number:** 5148

Solution: Fix for copying user terminal assignment from one terminal to another in the manager screen.

Date: 12/11/2013 11:19

Exe Version 6.38/5.38 **Number:** 5147

Solution:

1. Improvements for OpenChecks request via XML and 3rd party programs. Added logic that when an external program is called from a macro, AND the 3rd party program requests the currently open check via XML, spcwin will output the check information via xml.
2. In some situations, payment buttons may be missing when using conversational ordering and the user has not completed a requirement of an item.
3. Improvements for sites using the "Proceed to Payment" flag with user privilege 42, "Cannot Send on Separate Check"
4. Improvements for sites using the "Stay in System" option.
5. Fix for "multi-threading by channel" configuration. Some site had report that when one of the channels goes offline, the another channel stops sending transactions out as well.
6. Improvements for specials and repeat option.
7. Improvements for penny rounding and coin dispensers (Canada)

Date: 12/10/2013 17:03

Exe Version 6.36/5.36 **Number:** 5146

Solution: In some situations, payment buttons may be missing when using conversational ordering and the user has not completed a requirement of an item.

Report Number 39

04/01/2013 - 04/30/2014

Printed : 04/22/2014 16:31:14

Date: 12/09/2013 14:41

Exe Version 6.36.2/5.36.2 **Number:** 5140

Solution:

1. Improvements for sites using the "Proceed to Payment" option in conjunction with User Privilege #42, Cannot Send on Separate Check.
2. Multi threading improvements. Some sites have reported that one channel goes offline, all other channels stop processing.
3. Improved logic for the General Message, PAY when using Edit Tips on Payment.
4. Improvements for Unsettled Checks and users going to the Reopen Check Screen. In some cases, there may be too many Unsettled Checks to be handled correctly.

Date: 12/05/2013 16:25

Exe Version 6.36/5.36 **Number:** 5135

Solution:

1. Improvements for Penny Rounding and Stay In System (Canadian Systems)
2. Fix for "multi-threading by channel" configuration when if one of the channels goes offline, the another channel stops sending transactions out as well. This condition happens only if there are more than one CC request queued for the offline channel.
3. Some sites have reported an issue caused by the combination of "Proceed to Payment" flag, a check that was separated and the User Privilege #42 "Cannot Send on Sep Check".
4. Improvements for Specials and the Repeat Functionality
5. Some sites have reported balancing issues with sending CASH to the PMS with POST to All. The change amount is not always sent to the PMS.

Date: 11/25/2013 16:20

Exe Version 5.37/6.37 **Number:** 5092

Solution:

1. Improvements for Multi Threading By Channel. In some cases, when one channel is offline (middleware not responding) other channels will fail to process as well.
2. Improvements for specials and the REPEAT button.
3. Improvements for penny rounding and coin dispensers.
4. Improvements for the reference number field in CREDIT transactions when using CC Remote and check related overrings.

Date: 11/19/2013 11:54

Exe Version **Number:** 5093

Solution:

1. New "XML only" setting for user defined entries in credit card setup. This setting will restrict all cards from this BIN range to communicate with middleware through spcwin and ability to be entered in UI. Requires new bosetupw.exe.
2. Improvements for teams with more than 10 members.
3. Improvements for sites using "Edit tips at payment" and "PAY" General Message boxes.
4. Improvements for the reference number field in CREDIT transactions when using CC Remote and check related overrings.

Exe Version 5.36/6.36 **Number:** 5098

Solution:

SPCWIN French Version/English Version

1. Fix for penny rounding w/ currency conversion (no changes since the previous spcwin from earlier today)
2. SRM fixes related to penny rounding payment type
3. Added additional card processing data protection
4. Added prevention against Error 1000 on startup, in Demo mode when no network is in use.
5. Improvements for conversational ordering
6. Improvements for penny rounding and coin dispensers
7. Some sites have reported a Temporary Malfunction when printing a CC/GC/Loyalty transaction type in the French spcwin on various CC receipts.
8. Improvements for the option "Select Server First [name]/ Last [name]"

SPCWIN UPDATES BY DATE

04/01/2013 - 04/30/2014

Report Number 39

Printed : 04/22/2014 16:31:14

Date: 09/19/2013 19:57

Exe Version 5.38/6.38

Number: 5100

Solution:

- 1)Some sites have reported an issue when deleting an item from the check when item is part of Out of Stock and Specials list.
- 2)Fix for temp malfunction when creating canceled checks XML output whenusing FAST ORDER choice from the screen of Unpaid checks and then quitting out of that fast check.
- 3) Improvements for Teams and cash to remit. This implements a new user privilege that computes cash to remit that will be useful for server banking (although current math is fine) and for mixed cashier/server banking that sometimes occurs but becomes common when teams are in play.
- 4) improvements for showing all manager discounts on the discount screen after swiping a manager card. Some sites have reported that discounts do not appear as expected.
- 5)Some sites have reported an issue for Schedule Requests and the max number of schedule requests being reached.
- 6)Fix for occasional issue with splitting a check or recombining checks into one check where cell type 4 as the main item. Some sites have reported the quantity reports as zero, and the item not printing on the check.
- 7)Improvements for Specials and Quick Update
- 8)Fix for temp malfunction when printing a CC/GC/Loyalty transaction type in French spcwin on various CC receipts
- 9)New flag implementation: Time/date in check header only
- 10)Monetary label - new 4 character field for monetary label that can be filled with things like "\$" or "GBP" or "EUR"
- 11)Improvements for the feature to prevent reuse of CC. Added additional check at submitting CC for the processing to prevent the case of using the same CC card at two terminals almost simultaneously (both cards swiped or manually entered, first submitted for processing, the attempt to submit the second card for processing will be prevented.
- 12)The fix for LogicControls (original -- LS3000) KVDU bump bar issue when VDU #3 out of 4 VDU's has stopped registering bump bar buttons.
- 13)Fix for the feature of recombining previously separated checks from reopen screen when one or more of the checks had cell type 12 (Discount) applied
- 14)Improvements for penny rounding and preset change amount
- 15)Some sites have reported KVDUs (based on PC) flashing multiple times after ISC
- 16)Improvements for calculating loyalty amount on CC auth screen when going there from payment screen. Some sites have reported that the amount does not factor the tax correctly on the loyalty amount.
- 17)Fix for T&A chits with missing employee name
- 18) Improvements for PLU and coupons.

SPCWIN UPDATES BY DATE

04/01/2013 - 04/30/2014

Report Number 39

Printed : 04/22/2014 16:31:14

Date: 09/06/2013 10:26

Exe Version 5.37/6.37

Number: 5058

Solution: The following updates cover 03/11/13 - 08/14/13

03/11/2013

1. Added logic for Canada and the removal of pennies from their currency.
2. Improvements for Overring Checks with using Edit Tips at Payment = OFF
3. Improvements for Specials and various price levels when using the MODIFY function.
4. Improvements for deleting Combo'd items.

03/13/2013

Fixed an issue with the balance column of the take payment screen when dealing with pennies and the removal of pennies from the Canadian currency.

04/17/2013

1. Improvements for Remote Processing (customer activated) when using a single channel.
2. Added support for swiped card via external devices (~S and ~K). Compliant middleware required. (non-inline keyboard devices, Remote Processing)
3. Added support to block manually entered cards via external devices (inline keyboard devices) based on the POSitouch user privilege. Compliant middleware required.
4. Allow 4 columns of devices to be listed on the spcwin status screen.
5. Improvements for combos.
6. Improvements for covers.
7. Improvements for preventing more than 80 credit card authorizations on a check.
8. Improvements for No Payout of Tips functionality
9. Improvements when using the Reopen Check List with Advance Deposits.
10. Fixed an issue with the XML order confirmation file format (OUTPxxxx.xml) when created after 10pm.
11. Improvements for socket initialization.

05/01/2013

1. Improvements for remote processing and field 'b' of the AT&UM request where a manager override is required.
2. Fixed a repainting issue when split payments on the CC AUTH screen.
3. VDU Show Orders functionality improvements.
4. Improvements for closing XML orders with credit card authorizations and Edit Tips at Payment = OFF.
5. Improved logic allows for manual entry of cards via the inline keyboard external device based on User Privilege 142.
6. Improvements for the Remote Button on the CC AUTH screen when a partial approval is received.
7. Improvements for Start Tab and displaying the preauth amount.
8. Improved logic allows for manual entry of cards via the inline keyboard external device based on User Privilege 142.
9. Improvements for cell type 12s and quantity buttons.
10. Improvements for "Forced Memo" options and scanning of bar codes. In some cases, the system would not accept the bar code scan.

05/02/2013

1. Remote processing improvements.
2. Cell type 12s and overring improvements

05/15/2013

1. Improved performance for Windows 7 machines
2. Improvements with the VDU Summary screen.
3. Improvements for Remote Processing when using a manager card to enable Manager Only related functions (i.e. manual entry of card information)
4. SRM Improvements - added time on the guest check. (Canada Related)
5. Fixed an issue with gratuity amount on screens, when an item is deleted on the view/edit screen.
6. Improvements for general overrings when a gratuity is included and the transaction is missing field 'j', the token reference number, from the AT&UM command.
7. Improvements for AT&UM94 transactions. In some cases, if the user touches DEBIT, then REMOTE then ENTER, an AT&UM4 was sent to the middleware.
8. Added the ability to support REMOTE processing on the Start Tab screen via a new button. New UI required.
9. Improvements relating to XML ordering and applying a coupon, when the XML contains the tags: FullPrice and NetPrice.

06/14/2013

1. Improvements for Out of Stock and QuickMenu

Positouch

SPCWIN UPDATES BY DATE

Report Number 39

04/01/2013 - 04/30/2014

Printed : 04/22/2014 16:31:14

2. Fixed an issue with Separate Checks and the inability to choose the last item ordered.
3. Some users have reported an issue with the Tax Summary on reports.
4. Improvements for the outputting of sets in XML output files.
5. Some users have reported issues with multiple credit cards used for payment that are the same type (i.e. Visa)
6. Added protection against a temporary malfunction when:
SPCWIN shuts down for nightly, and
some fast order checks are still open; and
XML output is configured for "Canceled Checks"
7. New option: Prep Printer Redirection > Redirected to 0" will not redirect output.
8. Default to Debit option added.

06/27/2013

1. Improvements for combining checks, when Name/Name is in use.
2. Coin dispenser improvements
3. Improvements to logic when users linger on the time clock screen and then punch in after several minutes.
4. Improvements for manually entered coupon numbers (user defined cards) with external card readers (inline units)
5. Some users have encountered an issue with a missing ENTER AUTH # button when user privileges 34 is off and 118 is on.

06/28/13

New approach for getting the "on-line" status of KVDUs based on Logic Controls LS6000 (still needs new flag in Setup->RMD->/System 1->More: "KVDU Logic Controls LS6000?").
New approach is based on the new LS6000 feature that automatically every 10 sec submits the response back to spcwin that the unit is on-line

07/19/2013

1. Improvements for AT&UM94 transactions. In some cases, if the user touches DEBIT, then REMOTE then ENTER, an AT&UM4 was sent to the middleware.
2. Some users have reported issues with POSitem when:
 - a. Edit tips at payment = off
 - b. the payment is split between cash and credit card;
 - c. and the user entered cash first then went to cc auth.
3. Improvements for combos.
4. Improvements for covers and overrings. In some cases the cover count does not consider overring transactions
5. Improvements for order history in the club account module.
6. Improvements for separate checks and split payments.
7. Quick Update improvements when only employee data has changed.
8. Improvements for payment record memos and use of house charges configured as credit card in the payment setup area.
9. Improvements to prevent calling posinite more than once.

07/19/2013

1. Improved logic: Do not show Debit button when debit is not configured.
2. Improvements for house accounts flagged as credit card payment types.

07/26/2013

Implement printing of QR codes on the check via Guest Check Headings.

07/31/2013

1. Improvements for SRM (Canada)
2. Fixed an issue where:
 - a. if a credit card is declined by the middleware due to an invalid expiration date;
 - b. and the user manually reenters the card;
 - c. the invalid expiration date reappears on the screen.
3. Improvements for manually entered gift card via inline keyboard devices (Ingenico devices)

08/14/2013

1. Fixed an issue where the "Loyalty" amount displayed on the CC AUTH screen may be incorrect when entering the CC AUTH screen from the Payment screen. In some cases the loyalty amount may include the tax on the check.
2. Some users have reported the time and attendance chit in the front of the house may be missing employee names.
3. PLU and coupon use improvements.
4. Canadian penny rounding improvements.
5. Some users have reported KVDUs flashing multiple times after an immediate system change.

Solution: The following updates cover 01/30/2013 - 09/03/2013

01/30/2013

1. Added protection against a temporary malfunction when punching out employees with more than one job.
2. Improvements for running QuickMenu Enterprise. Not yet released.
3. Improvements for Conversational Ordering.
4. Some users have reported issues with REPEAT TABLE and time printed at the bottom of the check.
5. Added CC REPEAT functionality for remote transactions.
6. Improvements for KVDU when sending a large number of characters in excess of 10,000 bytes.

03/11/2013

1. Added logic for Canada and the removal of pennies from their currency.
2. Improvements for Overring Checks with using Edit Tips at Payment = OFF
3. Improvements for Specials and various price levels when using the MODIFY function.
4. Improvements for deleting Combo'd items.

03/13/2013

Fixed an issue with the balance column of the take payment screen when dealing with pennies and the removal of pennies from the Canadian currency.

04/02/2013

1. Improvements when using the Reopen Check List with Advance Deposits.
2. Fixed an issue with the XML order confirmation file format (OUTPxxxx.xml) when created after 10pm.

05/03/2013

1. Cell type 12s and overring improvements
2. VDU Show Orders functionality improvements.
3. Improvements for cell type 12s and quantity buttons.
4. Improvements for covers.

5/10/13 French & English

SRM Improvements - added time on the guest check. (Canada Related)

05/16/2013

Improvements with the VDU Summary screen.

05/17/2013

1. Improvements for loading larger punch files.
2. Improvements for closing XML orders with credit card authorizations and Edit Tips at Payment = OFF.

05/28/2013 French & English

1. Added SRM logic for reproduce checks duplication.
2. Added protection against a temporary malfunction when: SPCWIN shuts down for nightly, and some fast order checks are still open; and XML output is configured for "Canceled Checks"

05/29/2013

New option: Prep Printer Redirection > Redirected to 0" will not redirect output.

05/31/2013 French & English

Default to Debit option added.

06/28/2013 French & English

1. Coin dispenser improvements
2. Improvements to logic when users linger on the time clock screen and then punch in after several minutes.

07/08/2013

1. Added logic to prevent calling POSinite.exe more than once if already running.
2. New approach for getting the "on-line" status of KVDUs based on Logic Controls LS6000 (still needs new flag in Setup->RMD->/System 1->More: "KVDU Logic Controls LS6000?").

French version

08/08/2013 French & English

1. Some users have reported that user names are missing from the time clock chits.
2. Improvements for PLU and Coupons.
3. Fixed an issue where:
 - a. if a credit card is declined by the middleware due to an invalid expiration date;
 - b. and the user manually reenters the card;
 - c. the invalid expiration date reappears on the screen.
4. Additional improvements for KVDU LS6000 models.
5. Improvements for SRM (Canada)

08/13/2013 French & English Versions

1. Improvements for penny rounding (Canada) and preset change amounts.
2. Some sites have reported that KVDU screens may flash several times after an immediate system change.

08/14/2013 French & English versions
Additional SRM (Canada) Improvements.

08/15/2013

Some users have reported issues with recombining previously separated checks that contain a cell type 12 (Discount) applied.

08/26/2013

Improvements for sites using Windows 7 as the POS driver.

08/28/2013

Fixed an issue with Logic Control VDUS (LS3000) where a VDU may stop registering the bump bar actions. The issue is related to the new option implemented on 07/08/2013 relating to Logic Controls units LS6000.

08/29/2013 - French & English
Improvements for specials.

09/03/2013

1. New feature - Time & Date in check header only
2. New monetary label. Users may now create a custom label for money. For instance, "\$", "GBP" or "EUR".

SPCWIN UPDATES BY DATE

Report Number 39

04/01/2013 - 04/30/2014

Printed : 04/22/2014 16:31:14

Date: 09/06/2013 10:24

Exe Version 5.34/6.34

Number: 5056

Solution: The following updates cover 03/06/2013 - 08/21/2013

03/06/2013

Fixed an issue where menu terminal assignments could randomly change due to corruption in memory.

03/29/2013

Improved memory management for processing xml orders. Increased logging capabilities, also.

05/31/2013

Improvements for the Reopen-Recombine functionality.

07/08/2013

Fixed an issue with the Skip Transaction Complete option

07/08/2013

Added logic to ensure POSiNite.exe is not called multiple times.

07/25/2013

1. Improved logic in table status to prevent a temp malfunction.
2. Improved logic against poorly formatted xml orders.

08/21/2013

1. Improvements for sites using Windows 7 as the POS driver.

SPCWIN UPDATES BY DATE

04/01/2013 - 04/30/2014

Report Number 39

Printed : 04/22/2014 16:31:14

Date: 09/06/2013 10:23

Exe Version 5.36.2/6.36.2

Number: 5055

Solution: The following updates cover 04/10/2013 - 08/29/13

04/10/2013

1. Improvements for "Forced Memo" options and scanning of bar codes. In some cases, the system would not accept the bar code scan.
2. Improvements for combos.
3. Improvements for covers.
4. Improvements for preventing more than 80 credit card authorizations on a check.
5. Improvements when using the Reopen Check List with Advance Deposits.
6. Fixed an issue with the XML order confirmation file format (OUTPxxxx.xml) when created after 10pm.
7. Improved internal logic for processing xml orders
8. Improvements for preventing managers from paying overring checks when the User Privilege to prevent paying checks is enabled.
9. Improvements for Specials and various price levels when using the MODIFY function.
10. Improvements for deleting Combo'd items.

06/11/2013

Some users have reported an issue with the Tax Summary on reports.

06/14/13

1. Improvements for Out of Stock and QuickMenu
2. Fixed an issue with Separate Checks and the inability to choose the last item ordered.
3. Improvements for the outputting of sets in XML output files.

07/08/2013

1. Coin dispenser improvements
2. Improvements to logic when users linger on the time clock screen and then punch in after several minutes.
3. Fixed an issue with the "Enter Auth #" on the CC AUTH screen if user privilege 34 is off and 118 is on.

08/26/2013

1. Improvements for covers and overrings. In some cases the cover count does not consider overring transactions
2. Fixed an issue where the "Loyalty" amount displayed on the CC AUTH screen may be incorrect when entering the CC AUTH screen from the Payment screen. In some cases the loyalty amount may include the tax on the check.
3. Some users have reported the time and attendance chit in the front of the house may be missing employee names.
4. PLU and coupon use improvements.
5. fixed an issue with recombining of separate checks from the Reopen Checks screen, when one or more checks may contain a cell type 12 discount.

08/29/2013

Implemented improvements for sites using Windows 7 as the POSdriver.

SPCWIN UPDATES BY DATE

04/01/2013 - 04/30/2014

Report Number 39

Printed : 04/22/2014 16:31:14

Date: 09/06/2013 10:21

Exe Version 5.38/6.38

Number: 5054

Solution: The following updates cover 02/18/2013 - 08/02/2013

02/18/2013

Fix for loading grid.sys and moving grid2 data into the grid3 structure for costcenter names.

02/22/2013

1. Improvements for Tip Pool (Allow up to 10 tip pools)
2. Improvements for Overring Checks with using Edit Tips at Payment = OFF
3. Improvements for Specials and various price levels when using the MODIFY function.
4. Improvements for deleting Combo'd items.

03/04/2013

New Option: Credit and Debit Cards Allowed via Swipe Only

- For use with external card readers. SPCWIN will not accept cards swiped via the MSR reader. Compatible middleware required.

03/20/2013

1. Improvements to the Cashouts Printer as set in Cashouts > Cashouts 1 > Send all Cashouts to...
2. Fixed an issue with Quick Update and some users being locked.
3. Improvements for preventing managers from paying overring checks when the User Privilege to prevent paying checks is enabled.

03/28/13

1. General logic to remove curgrd24.sys in cases where 24 users are not in use. An improvement for Support personel who may install the file accidentally.
2. Added Terminal Number and Name to a virtual cashout.
3. Fixed an issue where a Type 1 record may be recorded to the tips file incorrectly.
4. Fixed an issue with the XML order confirmation file format (OUTPxxxx.xml) when created after 10pm.
5. Improvements for socket initialization.

04/08/2013

1. Improvements for combos.
2. Improvements for covers.
3. Improvements for preventing more than 80 credit card authorizations on a check.
4. Improvements for No Payout of Tips functionality
5. Improvements when using the Reopen Check List with Advance Deposits.

04/09/2013

Improved the header format of the cashout file output.

04/17/2013

1. Improvements for Remote Processing (customer activated) when using a single channel.
2. Added support for swiped card via external devices (~S and ~K). Compliant middleware required. (non-inline keyboard devices, Remote Processing)
3. Added support to block manually entered cards via external devices (inline keyboard devices) based on the POSitouch user privilege. Compliant middleware required.
4. Allow 4 columns of devices to be listed on the spcwin status screen.

04/19/2013

1. Some users have reported an error message of "Too Much Tip" when using a manager override on the payment screen.
2. Improvements for cell type 12s and quantity buttons.
3. Improvements for "Forced Memo" options and scanning of bar codes. In some cases, the system would not accept the bar code scan.

04/25/2013

1. Improvements for Remote Processing and deterring swiped cards via keyed card entry.
2. Improvements for XML Ordering. When submitting an order, and using the DefinedMenu field some users have reported the DefinedMenu was off by one menu.

04/26/2013

Improved logic allows for manual entry of cards via the inline keyboard external device based on User Privilege 142.

04/26/2013

1. Improvements for the Remote Button on the CC AUTH screen when a partial approval is received.
2. Improvements for Start Tab and displaying the preauth amount.
3. Improved logic for Manager Type 22 and 26 transactions.

SPCWIN UPDATES BY DATE

Report Number 39

04/01/2013 - 04/30/2014

Printed : 04/22/2014 16:31:14

Type 22 - Manager Approved Tip Adjustment on Cashout screen
Type 26 - Manager number now recorded.
Feature is not yet released.

04/30/2013

1. Improvements for closing XML orders with credit card authorizations and Edit Tips at Payment = OFF.
2. Improvements to Manager Transactions (not yet released)

05/01/13

1. Improvements for remote processing and field 'b' of the AT&UM request where a manager override is required.
2. Fixed a repainting issue when split payments on the CC AUTH screen.
3. VDU Show Orders functionality improvements.

05/02/13

1. Remote processing improvements.
2. Cell type 12s and overring improvements

05/09/13

1. Improvements for general overrings when a gratuity is included and the transaction is missing field 'j', the token reference number, from the AT&UM command.
2. Improvements for AT&UM94 transactions. In some cases, if the user touches DEBIT, then REMOTE then ENTER, an AT&UM4 was sent to the middleware.
3. Added the ability to support REMOTE processing on the Start Tab screen via a new button. New UI required.

05/13/13

1. Improvements for Remote Processing when using a manager card to enable Manager Only related functions (i.e. manual entry of card information)
2. SRM Improvements - added time on the guest check. (Canada Related)
3. Fixed an issue with gratuity amount on screens, when an item is deleted on the view/edit screen.
4. Improvements relating to XML ordering and applying a coupon, when the XML contains the tags: FullPrice and NetPrice.

05/16/13

1. Improvements for paying a check with multiple card types that are the same (i.e. visa) with the Edit Tips at Payment option = OFF.
2. Improvements with the VDU Summary screen.
3. Improvements in clearing unused memory blocks by spcwin.

06/28/2013

1. New logic for manually entered coupons when using external (remote) devices for card processing.
2. Added logic for a "round up for charity" function.
3. Fixed an issue with combined checks and Name/Name
4. Coin dispenser improvements
5. Improvements to logic when users linger on the time clock screen and then punch in after several minutes.
6. Fixed an issue with the "Enter Auth #" on the CC AUTH screen if user privilege 34 is off and 118 is on.
7. Fixed an issue with Separate Checks and the inability to choose the last item ordered.
8. Improvements for the outputting of sets in XML output files.
9. Some users have reported an issue with the Tax Summary on reports.
10. New option: Default to Debit
11. New option: Prep Printer Redirection > Redirected to 0" will not redirect output.
12. Added protection against a temporary malfunction when: SPCWIN shuts down for nightly, and some fast order checks are still open; and XML output is configured for "Canceled Checks"

07/10/13

1. Improvements for inline external card processing. Some users have encountered a debit button appearing when DEBIT is not in use.
2. Prevent the calling of POSinite.exe more than once.
3. New approach for getting the "on-line" status of KVDUs based on Logic Controls LS6000 (still needs new flag in Setup->RMD->/System 1->More: "KVDU Logic Controls LS6000?"). New approach is based on the new LS6000 feature that automatically every 10 sec submits the response back to spcwin that the unit is on-line
4. Fix for combos

07/29/2013

1. Improvements for gift card activations via inline keyboard devices where the cards were marked as swiped vs. manual entry.
2. Fixed an issue where

Report Number 39

04/01/2013 - 04/30/2014

Printed : 04/22/2014 16:31:14

2. Had an issue where:

a. if a credit card is declined by the middleware due to an invalid expiration date;

b. and the user manually reenters the card;

c. the invalid expiration date reappears on the screen.

3. Round up dollar amount functionality improvements.

4. QuickUpdate - in some situations QuickUpdate would not take effect if taemploy was updated but not user.sys.

5. Improvements for separate checks and splits.

6. Improvements for covers and overring checks

7. Improvements for club orders and multipliers.

8. Improvements for AT&UM94 transactions. In some cases, if the user touches DEBIT, then REMOTE then ENTER, an AT&UM4 was sent to the middleware.

9. Some users have reported issues with POSitem when:

a. Edit tips at payment = off

b. the payment is split between cash and credit card;

c. and the user entered cash first then went to cc auth.

10. Improvements for house accounts flagged as credit card payment types.

11. New: Added Intervals (in minutes) for XML Out of Stock file.

Users may now set the number of minutes between the creation of this file.

07/30/2013

Improvements for XML Popup requests. Some sites have reported that the xml popup request may interfere with normal processing.

08/02/2013

1. Added logic for an external program to request open checks via the <Terminal> tag.

2. SRM (Canada) improvements.
