SPCWIN UPDATES BY DATE

10/01/2017 - 10/31/2018

Report Number 39

Printed : 10/29/2018 16:23:44

---

<b>Exe Version</b>	6.41.0 Spanish	<b>Date:</b>	10/26/2018 16:26
<b>Number:</b>	5982		
<b>Solution:</b>	Spanish SPCWIN		

---

<b>Exe Version</b>	6.41.0	<b>Date:</b>	10/25/2018 09:45
<b>Number:</b>	5981		
<b>Solution:</b>	Improvements for Shift4 TID field that will be only applied under S4 flag and only for CC channel 1. The bug affected the PosiPay sites with this S4 TID field and Paytronix running on CC Channel 2. In some cases the Paytronix message may appear on the wrong terminal when using the S4 TID field in setup > hardware > terminal stations.		

---

<b>Exe Version</b>	6.41.0	<b>Date:</b>	10/24/2018 12:09
<b>Number:</b>	5980		
<b>Solution:</b>	New feature to allow sequential menuw style sets with QM.

## SPCWIN UPDATES BY DATE

10/01/2017 - 10/31/2018

Report Number 39

Printed : 10/29/2018 16:23:44

---

**Exe Version** 6.41.0 **Date:** 10/24/2018 11:24

**Number:** 5979

**Solution:**

1. Improvements for incorrect covers per hour.
2. Improvements for KVDU and showing the server/table number at the top and bottom of order.
3. Added declared tip adjustments to the time report.
4. Improvements for auto combos. In some cases the auto combo may not apply.
5. Fix for the issue when checks numbers having a sub check number for checks that were not supposed to have sub check numbers.
6. Improvements for \$0.00 sale and add Cash Back, the drawer is may not always open.
7. Improvements for the Tip calculating correctly using Tip preset buttons on CC auth screen. .
8. New flags:
  - Forward check and tax totals to middleware
  - Forward CC Tip amount to middleware
  - Do not print slips if Auth > ChkAmt
    - Used by POSipay and start tab. Will prevent a signature slip from printing when pre authing an amount.
  - Merchant Index - for use with POSIPAY and mutiple terminal IDs for a site that has multiple properties running on a single UTG/POSipay installation.
9. SPCWIN will now directly insert the date and version into Error.LST file.
10. Security.exe and License improvemetns.
  - a. Improved logic for the hardware signature verification.
  - b. Robust 3 day override logic in both SPCWIN.EXE or via new SECURITY.EXE that works with all spcwin versions.
  - c. Security /erase removes all pending updates
  - d. Added LocalIPAddress and LastShutdownDate tags to security.xml
  - e. Added the ability for spcwin to call an external batch or exe via topmsg.\$\$\$
  - f. Security.exe will automatically adjust UI based on the screen resolution. For smaller resolutions, UI will display in two-page mode if both license and HW key are on the system.
  - g. Added new security function 7 (added to the security sheets to be released next month) to globally reset CC communication from both spcwin.exe and security.exe. If used from security.exe, the new spcwin is required.
  - h. As the last step for both 1 and 3 day key overrides the spcwin will ask if the ISC is needed and will restart spcwin if ISC was requested

---

**Exe Version** 6.41.0 **Date:** 10/23/2018 15:36

**Number:** 5977

**Solution:**

1. Improvements for Card Lookup feature configured on Channel 2 and CC Remote processing on Channel 1. The problem was that if CC Remote channel was selected before touching Card Lookup button, the spcwin was sending Lookup transaction to Channel 1 instead of Channel 2. Primarily for POSIPAY sites.
2. As the last step for both 1 and 3 day key overrides the spcwin will automatically restart the spcwin after touching Ok button on the status dialog.
3. New feature to restrict tip adjust to tipped jobs. .

## SPCWIN UPDATES BY DATE

10/01/2017 - 10/31/2018

Report Number 39

Printed : 10/29/2018 16:23:44

---

**Exe Version** 6.41.0 **Date:** 08/31/2018 11:05

**Number:** 5975

**Solution:**

1. Improvements for sites using Quantity Buttons and Price Tables. Some sites may report pricing incorrect when using Quantity Buttons.
2. Fixed an issue with Quantity Buttons used for seat numbers. New functionality allows for numbers up to 999.
3. Added logic to update kitchen videos' check totals when items are deleted from the check.
4. Improvements for displaying the server and table number at the bottom of the vdu bottom.
5. Added the ability for job based menu assignments on fast order terminals.
6. PosiPay related fixes:
  - a. Permanently disable encryption on the PosiPay CC Channel 1
  - b. Added logic to SPCWIN where - if a gratuity is declined, SPCWIN will adjust the closed check to reflect a zero tip on the check. The server's cashout will also reflect the zero tip for the check. The same logic is applied to Tip Adjustment checks.
7. When using the "Include tip with auth amount" on the credit card auth screen, the screen may display in unexpected ways. Additionally, in some rare cases a message of "Insufficient fund for full tip" may display incorrectly, when a site does not use the "Enter Tips on CC AUTH" option.

---

**Exe Version** 6.41.0 **Date:** 08/16/2018 09:23

**Number:** 5972

**Solution:** Fixed an issue where the 'round up' feature, in rare cases may cause corruption in the payment record of a cash payment. SPCWIN.EXE dated 7/17/18 - 8/15/18 should be updated.

---

**Exe Version** 6.41.0 **Date:** 08/15/2018 15:11

**Number:** 5971

**Solution:**

1. Improvements for sending seat numbers in the XML output files, primarily used by kitchen video systems.
2. New logic: For the Start Tab name in EMV configuration. Manually entered Start Tab name will take precedence over the cardholder name obtained from the card processed on EMV device.

---

**Exe Version** 6.41.0 **Date:** 08/08/2018 19:25

**Number:** 5969

**Solution:**

1. Some sites have reported an issue with redeeming a gift card on one terminal while doing a tip adjustment on another.
2. Added logic to make PosiPay default settings:
  - Tip adjust in one transaction = ON
  - Use refund transaction = OFF
3. Fix for specific LevelUp issue of populating the payment screen with combination of "remote" and XML payment types.

## SPCWIN UPDATES BY DATE

10/01/2017 - 10/31/2018

Report Number 39

Printed : 10/29/2018 16:23:44

---

**Exe Version** 6.41.0 **Date:** 08/02/2018 12:11  
**Number:** 5968  
**Solution:**  
1. Release of the CASHBACK feature where users can account for cash given back to a guest above a "change" amount. Allows users to put a cash back amount on their credit card charge. New UI dat files are required for this feature.  
2. Changed the option "fast orders do not use starting check number"

---

**Exe Version** 6.41.0 **Date:** 07/30/2018 18:50  
**Number:** 5967  
**Solution:**  
1. New changed for POSiPAY as a service.  
2. Improvements for the option "File to prevent manual shutdown" in Restaurant Misc Data > System 3.

---

**Exe Version** 6.41.0 **Date:** 07/23/2018 18:58  
**Number:** 5966  
**Solution:**  
1. Fixed an issue with START TAB and EMV cards. Some sites reported SPCWIN restarting.  
2. Improvements for using Seat to Separate Checks.  
\* This SPCWIN should be used in place of 07/09/18 and 07/17/18 SPCWIN versions

---

**Exe Version** 6.41.0 **Date:** 07/17/2018 09:55  
**Number:** 5960  
**Solution:**  
1. Fixed an issue where Start Tab with EMV and a combination of using item REPEAT function on the order screen of another check, may cause issues when performed in a particular sequence of events.  
2. Improvements for the Round Up feature.  
3. Added the ability to assign a API TID (UTG Configuration Setting) to a terminal in the backoffice.  
4. Improvements for discounts related to discounts that subtract, max discount amount, open dollar discounts and multiple taxes.  
5. Improvements for sites using auto combos. Some sites reported a temporary malfunction in rare situations.

---

**Exe Version** 6.41.0 **Date:** 07/09/2018 18:56  
**Number:** 5957  
**Solution:** Added logic to allow seat numbers 1 - 999.

---

**Exe Version** 6.41.0 **Date:** 07/02/2018 14:33  
**Number:** 5954  
**Solution:** Fix for an uncommon Temporary Malufunction

---

**Exe Version** 6.41.0 **Date:** 06/27/2018 16:47  
**Number:** 5951  
**Solution:**  
1. Improvements for Start Tab and customer name on EMV transactions. In rare cases, the incorrect gues name may appear on a check.  
2. Increased logging ability with ARG2=456 for transerv IP and port logging.

# Positouch

## SPCWIN UPDATES BY DATE

10/01/2017 - 10/31/2018

Report Number 39

Printed : 10/29/2018 16:23:44

---

**Exe Version** 6.41.0 **Date:** 06/20/2018 18:57

**Number:** 5950

**Solution:**

1. Repeat does split with quantities. Added global flag for this feature. To have the repeat button split off items ordered with quantity you need:
  - a. Global mixed mod flag
  - b. New flag for this feature
  - c. Item in question needs cell mixed mod flag
2. Improvements for drive mirroring when the backup machine is a Windows 10 machine.
3. Improvements for POSiPAY when the first six digits of the bin range are not returned in an authorization. (i.e For sites where megaTokens may not have been activated on the processor side).

---

**Exe Version** 6.41.0 **Date:** 06/11/2018 15:03

**Number:** 5946

**Solution:**

1. Improvements: SPCWIN will back up the punch file every 10 minutes and when SPCWIN starts. Similar to the check file copies. Punch2.T00 through Punch2.T99 and Punch2.P00 through Punch2.P99. While the spcwin is running in the backup mode, it will make the copies Punch2.R00 through Punch2.R99
2. License related enhancements:
  - Allow one day key override -supercedes any license errors and a demo mode
  - Overrides "Do not allow to run system in DEMO mode if the license is not valid (expired, corrupted, etc)".
  - Extend validation window for license error 4 (PC signature mismatch) from one day to five days. This will give support extra days to resolve this type of license error caused by some posdrv hardware changes. The security.exe will reflect the end of 5 day validation window in the "valid until" display and in the <Valid> tag of security.xml.
  - Added support for "Seasonal" sites. Current PosiKey recently added "Seasonal" setting. If a site is marked as "Seasonal", online reporting for being offline will be increased to 30 days, versus the current two days.

---

**Exe Version** 6.41.0 **Date:** 06/06/2018 09:03

**Number:** 5942

**Solution:**

1. Improvements for open dollar discounts and application of multiple taxes.
2. Improvements for XML Ordering, PLU and Specials price overrides.
3. Improvements for option routing when using XML ordering.
4. OOS Groups. Adds an OOSGroupQuantity tag to oos xml file for items that have quantity 888 which means they are part of a group.
5. Fixed an issue with the Suggest Gratuity option not working.
6. Improvements for the option "Suggested Gratuity on CC Slips, only if full amount"
7. POSiPAY related improvements from all previous versions.
8. Improvements and new options for updating open checks via XML. New backoffice setting "Allows Allow".
9. Added visual highlighting to the CC REMOTE button on the left of the CC AUTH screen. The button will now be 'highlighted' if the user arrives on the CC AUTH screen by touching the REMOTE button on the payment screen.

## SPCWIN UPDATES BY DATE

10/01/2017 - 10/31/2018

Report Number 39

Printed : 10/29/2018 16:23:44

---

**Exe Version** 6.41.0 **Date:** 05/10/2018 14:56

**Number:** 5939

**Solution:**

1. For use with POSiPAY and other 3rd party programs using Transerv Channels. POSiPAY must be transerv channel 1.
2. Improvements for snapshot check total line.

---

**Exe Version** 6.41.0 **Date:** 05/03/2018 13:32

**Number:** 5936

**Solution:**

1. Improvements for Exception handling and XML ordering.
2. SPCWIN will now reject XML orders with ItemNumber 65000 and larger.
3. Improvements for dupe only if routed to option

---

**Exe Version** 6.41.0 **Date:** 04/29/2018 18:39

**Number:** 5934

**Solution:**

1. Improvements for sites using POSiCloud and having a large number of closed checks at the end of the day.
2. Fixed an issue where the NRT number may be read as zero (0).
3. New ability: Add the line into the spcwin.ini CFAccessLog=YES to log in the error.lst the list of the third part EXEs that prevent the spcwin from opening a check file. This line makes this feature optional instead of the default in the previous spcwin releases.
4. Improvements for the quantity tag for modifiers and banquet modifiers.
5. Improvements for XML out of stock reporting.
6. Fixed an issue where rear facing displays may not display correctly.
7. Improvements for user priv 122 - no cashout printout, and the PosiCloud file output.
8. Improvements for deleted cell type 27 memos excluded from checkfile.

---

**Exe Version** 6.41.00 **Date:** 04/23/2018 20:15

**Number:** 5933

**Solution:**

1. improvements for multipliers in XML, cloud API. Not yet released.
2. Added logic to allow 3rd party EMV responses to reply with XXXXXX or xxxxxx in the cc auth reply. Previously only xxxxxxx was permitted.
3. POSiPAY improvements for long responses.

---

**Exe Version** 6.41.0 **Date:** 04/20/2018 12:22

**Number:** 5932

**Solution:**

1. Improvements in software license registration and HW key management.
2. Fix for handling suggested (applied) gratuity in case of limited balance gift cards/branded credit cards when processed remotely (EMV) and processed in SPCWIN as the pseudo debit mode.

# Positouch

## SPCWIN UPDATES BY DATE

10/01/2017 - 10/31/2018

Report Number 39

Printed : 10/29/2018 16:23:44

---

**Exe Version** 6.40 **Date:** 04/11/2018 13:03  
**Number:** 5930  
**Solution:** 1. Improvements for the Out of Stock XML file (OOS.XML). In some cases the out of stock may report incorrectly.  
2. Improvements when using the "Print EMV data on validated check" option and there are multiple card payments (gift cards) on the check.  
In some cases, duplicate slips may print.

---

**Exe Version** 6.41.0 **Date:** 04/10/2018 14:01  
**Number:** 5929  
**Solution:** 1. Improvements when using the "Print EMV data on validated check" option and there are multiple card payments (gift cards) on the check.  
In some cases, duplicate slips may print.

---

**Exe Version** 6.41.0 **Date:** 04/09/2018 15:31  
**Number:** 5928  
**Solution:** 1. Improvements for Tax Exempt Discount to block comps.  
2. Improvements for XML ordering when attempting to open the check at a terminal.

---

**Exe Version** 6.41.0 **Date:** 04/05/2018 08:32  
**Number:** 5927  
**Solution:** 1. Improvements for printing suggested gratuities when not all six suggested gratuities are used.  
2. Some sites may report that when reprinting a credit card, the entered tip amount does not print.  
3. Some sites may report that the option "Flash Category required to close check" is not working.  
4. Fixed a rate issue where items would be zeroed out after the check was closed.

---

**Exe Version** 6.40/5.40 **Date:** 04/05/2018 08:22  
**Number:** 5926  
**Solution:** English & French Versions  
Improvements when printing suggested gratuities.

---

**Exe Version** 6.40/5.40 **Date:** 04/02/2018 12:15  
**Number:** 5925  
**Solution:** 1. Improvements for Round Up for Charity.  
In some cases the next dollar amount may not be rounded up to.  
2. In rare cases, once a check is closed, the items on the check may be zeroed out.

---

**Exe Version** 6.41.0 **Date:** 04/02/2018 11:40  
**Number:** 5924  
**Solution:** 1. Improvements for using 6.41.0 on POSReady 2009 systems. Some systems did not originally support the newer SPCWIN version.  
2. Improvements for Round Up for Charity.  
In some cases the next dollar amount may not be rounded up to.

---

**Exe Version** 6.41.0 **Date:** 03/27/2018 11:41  
**Number:** 5923  
**Solution:** Various VDU improvements

**Positouch**  
**SPCWIN UPDATES BY DATE**

Report Number 39

**10/01/2017 - 10/31/2018**

Printed : 10/29/2018 16:23:44

---

<b>Exe Version</b>	6.40/5.40	<b>Date:</b>	03/22/2018 17:13
<b>Number:</b>	5920		
<b>Solution:</b>	1. Improvements for Suggested Gratuities from 03/15/18. 2. Fixed an issue with the new "REFUND TRANSACTION", where the tip amount may not be included in overring checks.		

---

<b>Exe Version</b>	6.41.0	<b>Date:</b>	03/22/2018 16:43
<b>Number:</b>	5919		
<b>Solution:</b>	1. Replaces SPCWIN 6.41.0 dated 02/28/18 and 03/11/18. Some middlewares may not handle the additional data in a credit card transaction request. Additional data has been removed. 2. Improvements for Quick Update when sites use daily SPECIALS file. 3. Allow the use of suggested gratuities 4 - 6, even when suggested gratuities 1 - 3 are not in use. 4. Improvements around the exclusive comps option. 5. Added logic to record any program that is currently locking the checkfile from being accessed. The entry in the error.lst would be similar to: 03/20/18 15:35:38 911 (1)The check file US032018.INV is currently open by <C:\Program Files (x86)\BreakPoint Software\Hex Workshop 4.2\hworks32.exe>		

---

<b>Exe Version</b>	6340/5.40	<b>Date:</b>	03/15/2018 17:49
<b>Number:</b>	5918		
<b>Solution:</b>	English & French versions. 1. Added logic to allow suggested gratuities # 4 - 6, even when #1 - 3 are not in use. 2. Fixed an issue with adjustments when using the option Post Checks and Payments to Cashier.		

---

<b>Exe Version</b>	6.41.0	<b>Date:</b>	03/11/2018 17:41
<b>Number:</b>	5916		
<b>Solution:</b>	Fixed an issue Tax Included discounts.		

---

<b>Exe Version</b>	6.41.0	<b>Date:</b>	02/28/2018 12:00
<b>Number:</b>	5915		
<b>Solution:</b>	1. Fix to prevent adding option to a check as a very first item through entering PLU number. The problem was that PrepOrder XML output was missing all ItemDetail sections details. 2. New: Populate check total amount (w/o tax) and total tax amount in the fields 'r' and 's' on every AT&UM transaction. 3. Fix for the DefaultPaymentType tag, that should apply only to the current XML order and the check for this XML order. 4. Fix for round up feature, where it re-enters last amount on a random check.		

---

<b>Exe Version</b>	6.40	<b>Date:</b>	02/28/2018 09:00
<b>Number:</b>	5914		
<b>Solution:</b>	1. Fix for the DefaultPaymentType tag, that should apply only to the current XML order and the check for this XML order. 2. Fix for round up feature, where it re-Enters last amount on a random Check.		

---

## SPCWIN UPDATES BY DATE

Report Number 39

10/01/2017 - 10/31/2018

Printed : 10/29/2018 16:23:44

---

<b>Exe Version</b>	6.41.0	<b>Date:</b>	02/22/2018 17:28
<b>Number:</b>	5911		
<b>Solution:</b>	<ol style="list-style-type: none"><li>1. Fixed an issue with "Post Payments to Cashier" and reopening a closed check. An accounting issue with the cashouts could occur.</li><li>2. Improvements for XML Ordering - where an order's check number or credit card authorization number may be damaged.</li><li>3. Improvements for Out of Stock and Specials where the count may be reduced, but not incremented, when a bounce order (Function 1, ErrorLevel 1) or a failed "New Order" or "Update Order" occurs.</li><li>4. Improvements for XML &lt;ItemName&gt; tag when using the inventory description. Modifiers are now included, as well as, main items.</li><li>5. General housekeeping improvements.</li><li>6. Improvements allow the START TAB option, when using EMV, to record the guest's name without waiting for approval of the card amount for Pre-Auth.</li><li>7. Improvements for Prep Sequence Name on View/Edit screen.</li><li>8. Improvements for AMEX cards and EMV, when using the Repeat option on CC AUTH. In some cases, the middleware may return an unexpected number of digits representing the card number. In these cases, when the user chooses REPEAT, the system may not display the new check total for approval.</li></ol>		

---

<b>Exe Version</b>	6.41.0	<b>Date:</b>	02/07/2018 18:18
<b>Number:</b>	5908		
<b>Solution:</b>	Improved logic for AMEX transactions done via EMV. In some cases, the middleware may not return the expected number of digits when using an AMEX card. (The card number is masked when sent to POSitouch). When using the REPEAT option on the CC AUTH screen, the amount may be incorrect - reflecting only the outstanding balance of the check and not the new total of the check.		

---

<b>Exe Version</b>	6.41.0	<b>Date:</b>	02/05/2018 15:58
<b>Number:</b>	5907		
<b>Solution:</b>	<ol style="list-style-type: none"><li>1. Fixed an issue with SPCWIN version 6.41.0 from 11/28/17, where, after an immediate system change, the wrong user may be displayed when another user logs into the system.</li><li>2. Out of Stock and XML Ordering improvements. In some cases, when an item is listed under Out of Stock and specials, if a "NEW" or "UPDATE ORDER" is received via XML Ordering, and the order fails, the item's count is reduced by one and not incremented. A bounce order (Function 1, ErrorLevel 1) had the same effect, lowering the count of the item, incorrectly.</li><li>3. Enforce the user privilege "Access Others' Tables" on Table View.</li><li>4. Improved XML Ordering and &lt;ItemName&gt; tag, using inventory description. Added logic to apply to modifiers, as well as, main items.</li><li>5. Improvements for XML Services and messages (where a large red box appears with a message). In some cases, the popup message may be behind standard POSitouch messages, causing POSitem to stop responding, since the user cannot confirm the popup message.</li><li>6. Improvements for Start Tab and EMV. Previously, users had to wait to ring in items until the preauth amount was approved, in order for the name on the card to be captured.</li><li>7. Improvements for Prep Sequence name on View/Edit.</li><li>8. Improvements for Check CVV and CVV Length when used in conjunction with gift cards.</li><li>9. New option. Setup &gt; Payment &gt; Forms of Payment &gt; Manager's Authorization Required? &gt; If Over: Allows users to set an amount, and if over that amount, requires a manager's approval.</li><li>10. Housekeeping improvements.</li></ol>

## SPCWIN UPDATES BY DATE

Report Number 39

10/01/2017 - 10/31/2018

Printed : 10/29/2018 16:23:44

---

**Exe Version** POSitem.exe **Date:** 01/19/2018 10:49

**Number:** 5906

**Solution:** PositemRebootTime=HH:MM  
Example:  
PositemRebootTime=03:30

Reboots PC at the time specified (within 5 min after the desired time - not at exact time). Positem is programmed to reboot only once in 24 hours. The reboot log goes to the termerr.log

---

**Exe Version** 6.41 **Date:** 01/09/2018 15:14

**Number:** 5904

**Solution:**

1. Fixes an issue with Bonus Card issuances.
2. New XML option to allow a XML order to open automatically at a POS terminal.
3. New remote printing options to print a slip for any manually entered card at the remote device. Middleware dependent.
4. Some sites report the inability to access Table Management without a daily override.
5. Improvements for the 'conversational ordering' and mixed modifiers ability.

---

**Exe Version** 6.41.0 **Date:** 12/18/2017 20:16

**Number:** 5901

**Solution:**

1. Improvements for the option "Flash Category Blocks Pay Type" when using Bonus Cards.
2. Improvements for the "Flash Category Exclusive" option
3. Improvements to writing the check file data to prevent check file corruption.
4. Added the ability to display the server number on the User/Cash Drawer assignment screen.
5. Improved logic for sites using paper gift certificates that may encounter a temporary malfunction when entering the serial number.
6. Improved the ability to have multithreaded transerv channels as well as non-multithreaded channels. In some cases, non-multithreaded channels may have unintentionally become multithreaded.
7. Fixed an issue with the Exit Auth Screen flag under User Defined Cards, where the system would not exit the authorization screen upon receiving an authorization.

**Solution:** 1. Improved the ability to have multithreaded transerv channels as well as non-multithreaded channels. In some cases, non-multithreaded channels may have unintentionally become multithreaded.  
2. Fixed an issue with the Exit Auth Screen flag under User Defined Cards, where the system would not exit the authorization screen upon receiving an authorization.

---

**Exe Version** 6.41.0 **Date:** 11/28/2017 12:24  
**Number:** 5892  
**Solution:** 1. Some sites report that the NRT number does not appear on some reports.  
2. Allow (based on a setting) for an XML order to be applied to a check while the check is open at a terminal.  
3. Changed the company name in SPCWIN to "POSitouch, LLC"

---

**Exe Version** 6.41.0 **Date:** 11/13/2017 16:54  
**Number:** 5887  
**Solution:** 1. Improvements for Discounts 1 - 15 being used as an open dollar discount AND posts to a single inventory item. A rarely used combination.  
2. New feature - Max mods based on quantity - When using quantities and modifiers, sites may now choose to charge for the X number of most expensive modifiers. For instance, a pizza with 6 toppings, the top 5 most expensive modifiers would be added to the price.

---

**Exe Version** **Date:** 11/13/2017 15:10  
**Number:** 5886  
**Solution:** 1. Some sites may come out of redundancy and the check file from the backup machine may not be copied back to the main POS driver. This fix addresses the issue of coming BACK from redundancy on the main POS driver.

Printed : 10/29/2018 16:23:44

---

**Exe Version** 6.41.0 **Date:** 11/07/2017 11:42

**Number:** 5884

**Solution:** 1. Fix for missing gratuity transaction when closing a check with a bonus card redemption.

2. Fix for divide by X buttons on the CC auth screen. The issue was that in some cases when divide by X buttons were used, the remaining balance of the check before the final "divide by x" application might be within few cents of the amount behind by divide by X button causing some UI confusion when closing the check. The text on the divide by X button will not change but the amount produced by the button after it is touched will be the exact remaining balance on the check. For example: the check amount is \$10.00. The server used "divide by 3". The button shows \$3.33. Before the third use of "divide by 3" the remaining balance on the check will be \$3.34. The "divide by 3" button will still say \$3.33 but touching \$3.33 will not alter the remaining check balance of \$3.34.

---

**Exe Version** 6.41.0 **Date:** 11/01/2017 17:51

**Number:** 5881

**Solution:** Added functionality in bosetup2.exe to restrict by cost center.

<b>Exe Version</b>	6.41.0	<b>Date:</b>	10/31/2017 16:43
<b>Number:</b>	5880		
<b>Solution:</b>	<ol style="list-style-type: none"><li>1. Improved logic and design. For sites with a large quantity of open checks, this SPCWIN.EXE adds the ability to have up to 4000 open checks with credit card payments attached.</li><li>2. Allow up to 5 digits for CC record number in CC Tip adjustment.</li><li>3. Increase the maximum length of the payment memo from 499 to 5000 characters</li><li>4. Improved logic for allowing manually entered CVV code for users configured with the user priv that does not allow manual CC transactions (user priv 34/142).</li><li>5. Fix for the spcwin coming up in Redundancy mode and failing with the security fault #1 error on the redundant machine.</li><li>6. Improvements for gift cards and tip adjustments for gift cards configured with "track 1" character that separates various types of gift cards with the same BIN range.</li><li>7. Improved logic for sites using gift cards and the CC Repeat function. Some middlewares may have had issues with with the repeat function.</li><li>8. Some sites report issues with the Reproduce Checks option on the Cashout Screen, when attempting to reproduce checks for a server that did not yet close any checks.</li><li>9. New Logic/Features<ol style="list-style-type: none"><li>a. Cell type 2 multipliers can be configured for a preset quantity, and applied only to the next item.</li><li>b. New design for ordering "items that come in buckets", i.e. wings, bears, chicken...</li><li>c. Guest check totals, by guest - will always have a total line for each guest</li><li>d. Added logic using the REPEAT button, which can be used also a "SPLIT/REPEAT" button. This allows users to choose a quantity of items (i.e 4 Tacos) and modify all 4. Touching the REPEAT button on the "4 Tacos" will allow the user to SPLIT the 4 (as in 3 tacos and 1) where the 1 taco can then modified further, adding or removing options.</li><li>e. Falsh Category Required for Manager Payment: requires a particular flash category to allow a manager payment type to be applied.</li><li>f. Prevent unacknowledged exceptions from repeating as a new exception every 10 minutes.</li><li>g. Prevents writing an out of stock record each time someone reviews the current out of stock list.</li><li>h. Added the ability to use Price 9 as a message on modifiers (already allowed on main items)</li><li>i. Added a user privilege for Reopen Review by user type.</li><li>j. Allow a menu cell - Alternate Menu - to change a fast order type of order to another order type, as in Retained Check.</li><li>k. Allow the data files that update the sales data for graphs and online reporting - to be created and written while in Time Clock Only mode.</li><li>l. Added logic in Hardware &gt; Prep Printers - Dupe only if Routed to. If an order is sent, and contains items for a station A's printer, PLUS items for another station, station A's printer will print the other station's items as well, notifying station A that there are other items on the slip.</li></ol></li></ol>

<b>Exe Version</b>	6.40/5.40	<b>Date:</b>	10/26/2017 12:47
<b>Number:</b>	5879		
<b>Solution:</b>	<ol style="list-style-type: none"><li>1. Improvements for tip adjustments performed on gift cards, using the Track 1 surname field to separate gift card types.</li><li>2. Improvements for the CC REPEAT functionality with gift cards. Some middlewares may have difficulty with the request.</li><li>3. Added protection for the option "Reproduce Checks" in the "Cashout" screen. Some sites may encounter an issue when choosing REPRODUCE CHECKS for a user that has no closed checks.</li><li>4. Improvements for the &lt;MagCardRequest&gt; XML with the property &lt;Function&gt;. When loyalty redeem is enabled in the POS, the &lt;MagCardRequest&gt; XML with the &lt;Function&gt; "Gift Card" was blocked with an error in the top bar</li><li>5. Some sites may report issues with printing QR codes on slips.</li><li>6. Improved logic. When using the Unsettled Checks feature to close multiple checks, some users may encounter an issue with adjusting the closed check when credit cards are used for payment. The adjustment attempt may not show the credit card(s) used for the payment of the check.</li><li>7. Some sites have reported issues where, when applying a discount on the take payment screen, and a memo is entered, the user may not be returned to the Take Payment screen.</li><li>8. Added logic for Server Commissions. Some sites may report an issue when a check is reopened by another server and then printed, and the system is configured to print more than one copy of the guest check.</li><li>9. Some users may report the auto combo changes the prices to hundreds of dollars.</li></ol>		

---

<b>Exe Version</b>	6.41.0	<b>Date:</b>	10/13/2017 14:30
<b>Number:</b>	5871		
<b>Solution:</b>	Improvements for the <MagCardRequest> XML with the property <Function>. In some cases, when loyalty redeem is enabled in the POS, the <MagCardRequest> XML with the <Function> "Gift Card" was blocked with an error in the top bar.		

---

<b>Exe Version</b>		<b>Date:</b>	10/12/2017 14:37
<b>Number:</b>	5870		
<b>Solution:</b>	<ol style="list-style-type: none"><li>1. Change: When using POSiCloud, alerts will only appear once. In the restaurant, alerts will continue to flash at all POS terminals, every 10 minutes until acknowledged.</li><li>2. Some sites have reported issues with printing QR codes, where a printer may suddenly stop responding.</li></ol>		

---

<b>Exe Version</b>	6.41.0	<b>Date:</b>	10/11/2017 21:49
<b>Number:</b>	5868		
<b>Solution:</b>	<ol style="list-style-type: none"><li>1. Some sites may report missing credit card authorization when doing overrings on checks that were in the Unsettled Checks, and closed via the PAY CHECK button.</li><li>2. If using Discounts on the Take Payment screen, and a memo is required, some users may encounter an issue after entering a memo, the system does not return to the payment screen.</li><li>3. Fixed: When using Server Commissions, and a closed check is reopened by another server and printed, a malfunction may occur.</li></ol>		

---

<b>Exe Version</b>	6.41.0	<b>Date:</b>	10/02/2017 14:22
<b>Number:</b>	5864		
<b>Solution:</b>	Some sites report issues at startup with very large Lookup.txt files.
