## SPCWIN UPDATES BY DATE

Report Number 39

Printed : 12/26/2014 10:33:09

---

**Date:** 11/03/2014 10:22 **Product:** 6.40

**Exe Version** 6.40/5.40 **Number:** 5371

**Solution:**

1. Improvements for the "Round Up for Charity" functionality.
2. Improvements for adding club account information to the expo slip.
3. Added logic for a floor price for coupons.

---

**Date:** 10/22/2014 18:40 **Product:** (No Product Entered)

**Exe Version** 6.40/5.40 **Number:** 5369

**Solution:**

1. New: @ for kvdu. The @ character in a modifier name says "show this item in the vdu window and on the summary screen".
2. Fix for FOH Reproduced checks missing tip/check/table number for XML order checks.
3. Added TokenReferenceNumber tag (when exists) to CreditCardAuth section for all XML outputs.

---

**Date:** 10/20/2014 09:17 **Product:** (No Product Entered)

**Exe Version** 6.40/5.40 **Number:** 5368

**Solution:**

1. New manager transactions numbered 27 - 31.
2. Improvements for customer displays. Some users may not see the last character or decimal number.
3. Improvements for systems interfacing with POSiq.
4. Improvements for club account items and multiple club accounts. New flag allows unlimited menu items to be added to checks via the club member menu item.

---

**Date:** 10/07/2014 08:59 **Product:** (No Product Entered)

**Exe Version** 6.40/5.40 **Number:** 5366

**Solution:**

1. Improvements for check file mirroring.
2. Improvements for sites combining 4 or more checks. Some sites have reported an issue with combining multiple checks.
3. Improvements for coupon cards being applied to a check.
4. Improvements for the xml ordering debug log.

---

**Date:** 09/23/2014 09:34 **Product:** 6.40

**Exe Version** 6.40/5.40 **Number:** 5359

**Solution:** Improved logic allows overpayments of various payment types to show on the payment screen as change (beyond cash payments)

---

**Date:** 09/19/2014 17:33 **Product:** 6.40

**Exe Version** 6.40/5.40 **Number:** 5358

**Solution:**

1. Fixed an issue with Out of Stock, deletes and item quantities.
2. Improvements concerning the clock time. AM/PM changes in the time clock area as opposed to military time.

---

**Date:** 09/16/2014 12:48 **Product:** 6.40

**Exe Version** 6.40/5.40 **Number:** 5357

**Solution:**

1. Improvements for the SRM requirements in Canada.
2. Improved General Adjustment user interface flow when using the Edit Tips on Payment option.

## SPCWIN UPDATES BY DATE

Report Number 39

Printed : 12/26/2014 10:33:10

---

**Date:** 07/24/2014 10:22 **Product:** 6.40  
**Exe Version** 6.40/5.40 **Number:** 5330  
**Solution:** Added logic to exclude split items from coupon eligibility.

---

**Date:** 07/24/2014 10:22 **Product:** 6.34/5.34  
**Exe Version** 6.34/5.34 **Number:** 5331  
**Solution:** Fixed an issue with the naming of the PTmmdy file when in Time Clock Only mode. The name should be the shutdown date.

---

**Date:** 07/24/2014 10:22 **Product:** 6.40  
**Exe Version** 6.40/5.40 **Number:** 5326  
**Solution:** Some sites have encountered an issue with adjusting tips for non-pos users in the front of the house.

---

**Date:** 07/08/2014 14:52 **Product:** 6.40  
**Exe Version** 6.40/5.40 **Number:** 5325  
**Solution:** Some sites may encounter an issue with the Seats on Expo Slip Only option.

---

**Date:** 07/08/2014 12:22 **Product:** 6.40  
**Exe Version** 6.40/5.40 **Number:** 5324  
**Solution:** 1. Some sites may report checks reporting as Busy when they are not open at other terminals.  
2. Improvements for the Expedite feature (cell type 17)

---

**Date:** 06/24/2014 08:51 **Product:** 6.36/5.36  
**Exe Version** 6.36/5.36 **Number:** 5319  
**Solution:** 1. Improvements for sites using the Server Team Split Up feature. Some sites may encounter an spcwin restart.  
2. Improvements for sites using Paytronix where the system may stop responding when using the Lookup function.  
3. Improvements for XML ordering when using the <PaymentAmount> and <PaymentTip> tags for non-credit card payments.  
4. Some users may encounter a spcwin restart when swiping a manager card on the discount screen - accessed from the payment screen - to display additional discounts under manager only control.

---

**Date:** 06/19/2014 19:03 **Product:** 6.40  
**Exe Version** 6.40/5.40 **Number:** 5318  
**Solution:** Improvements for Name/Name and "Lookup on Reopen and Take Payment screens by Name/Name".

---

**Date:** 06/19/2014 14:36 **Product:** 6.40  
**Exe Version** 6.40/5.40 **Number:** 5317  
**Solution:** KVDU Features - New  
1. Allow multiple Master VDUs (up to two). Setup > Hardware > KVDU > Master and Master 2  
2. Allow number in party to be displayed in the header of the KVDU ticket. Setup > RMD > Fast Food 2 > Customize VDU Window > # in Party  
3. Cell type 17, Expedite > still works if you use it at the time of ordering, and now will also Jump an order to the front of the line when applied after the items have already been sent.

---

**Date:** 06/19/2014 14:24 **Product:** 6.37/5.37  
**Exe Version** 6.37/5.37 **Number:** 5316  
**Solution:** Improvements for Conversational Ordering

**Exe Version** 6.40/5.40 **Number:** 5313  
**Solution:**

1. New: Added the ability to have a user defined button on the payment screen. New option in Setup > Payment > Payment System > Options 1 > More > User Program on Payment Screen?
2. Improved logic for displaying payments (when using Edit Tips at Payment) - if a site has authorized cards, and the check amount has been reduced to less than the authorizations, only authorizations totalling LESS than the check total will be displayed. The remaining balance of the check will be available to pay to another form of payment.

---

**Date:** 06/17/2014 20:37 **Product:** 6.37/5.37  
**Exe Version** 6.37/5.37 **Number:** 5311  
**Solution:** Improvements for sites using Conversational Ordering.

---

**Date:** 06/17/2014 11:52 **Product:** (No Product Entered)  
**Exe Version** POSitem **Number:** 5306  
**Solution:** Improvements for sites using a macro to call a user defined program, that then calls another program.

---

**Date:** 06/17/2014 11:52 **Product:** 6.40  
**Exe Version** 6.40/5.40 French **Number:** 5305  
**Solution:**

1. Improvements for the user programmable button on the payment screen. New feature. Button can be used by 3rd party programs to access their program on the payment screen.
2. Improvements for cell type 12.

---

**Date:** 06/17/2014 11:52 **Product:** (No Product Entered)  
**Exe Version** POSITERM **Number:** 5304  
**Solution:** Some users have reported issues with macros attached to a button and calling an external program when another macro, attached to another button, calls the same external program.

---

**Date:** 06/17/2014 11:52 **Product:** 6.40  
**Exe Version** 6.40/5.40 and French Versions **Number:** 5302  
**Solution:**

1. Improvements for XML ordering when separating checks and attempting to pay the checks via xml ordering.
2. Some sites may encounter issues when selling pre-numbered, open dollar, gift certificates.
3. Some sites may encounter issues when a manager swipes their card to access additional discounts on the discount screen, after arriving from the payment screen.

---

**Date:** 06/09/2014 09:47 **Product:** 6.40  
**Exe Version** 6.40/5.40 **Number:** 5297  
**Solution:** Improvements when writing out the exeptions file (EXmmdyy.DAT)

---

**Date:** 06/09/2014 09:47 **Product:** 6.40  
**Exe Version** 6.40/5.40 **Number:** 5295  
**Solution:** Improvements related to teams and gratuity issues.

**Report Number 39**

**Printed : 12/26/2014 10:33:10**

**Date:** 04/04/2014 11:57

**Product:** 6.40

**Exe Version** 6.40/5.40

**Number:** 5250

- Solution:**
1. Improvements for number of check copies being set to greater than 1 and KVDU displays.
  2. Some fast order sites may report a black bar appearing on the show orders screen on top of the PAY button.
  3. Adjust payments improvements.
  4. New functionality relating to POSiPortal
  5. improved reporting for hourly sales in POSiPortal
  6. Tax Included Subtotal improvements when printing.
  7. Improved logic for using set modifiers and memos - where memos are entered just before the set modifier.
  8. Improved performance for QuickMenu and Sets.
  9. VDU time reset and overdue time improvements.
  10. Improvements for Out of Stock and XML ordering. If an XML order fails, or is canceled or deleted, Out of Stock items that were ordered are added back into stock.
  11. Improvements for responses to adding loyalty points, when the middleware returns a custom text of "^" in the response.

**Date:** 04/03/2014 15:24

**Product:** 6.40

**Exe Version** 6.40/5.40

**Number:** 5248

- Solution:**
1. Improvements for number of check copies being set to greater than 1 and KVDU displays.
  2. Some fast order sites may report a black bar appearing on the show orders screen on top of the PAY button.
  3. Adjust payments improvements.
  4. New functionality relating to POSiPortal
  5. improved reporting for hourly sales in POSiPortal
  6. Tax Included Subtotal improvements when printing.
  7. Improved logic for using set modifiers and memos - where memos are entered just before the set modifier.
  8. Improved performance for QuickMenu and Sets.
  9. VDU time reset and overdue time improvements.
  10. Improvements for Out of Stock and XML ordering. If an XML order fails, or is canceled or deleted, Out of Stock items that were ordered are added back into stock.
  11. Improvements for responses to adding loyalty points, when the middleware returns a custom text of "^" in the response.

## SPCWIN UPDATES BY DATE

Report Number 39

Printed : 12/26/2014 10:33:10

---

**Date:** 12/09/2013 14:41 **Product:** 6.36.2/5.36.2  
**Exe Version** 6.36.2/5.36.2 **Number:** 5140

**Solution:**

1. Improvements for sites using the "Proceed to Payment" option in conjunction with User Privilege #42, Cannot Send on Separate Check.
2. Multi threading improvements. Some sites have reported that one channel goes offline, all other channels stop processing.
3. Improved logic for the General Message, PAY when using Edit Tips on Payment.
4. Improvements for Unsettled Checks and users going to the Reopen Check Screen. In some cases, there may be too many Unsettled Checks to be handled correctly.

---

**Date:** 12/05/2013 16:25 **Product:** 6.36/5.36  
**Exe Version** 6.36/5.36 **Number:** 5135

**Solution:**

1. Improvements for Penny Rounding and Stay In System (Canadian Systems)
2. Fix for "multi-threading by channel" configuration when if one of the channels goes offline, the another channel stops sending transactions out as well. This condition happens only if there are more than one CC request queued for the offline channel.
3. Some sites have reported an issue caused by the combination of "Proceed to Payment" flag, a check that was separated and the User Privilege #42 "Cannot Send on Sep Check".
4. Improvements for Specials and the Repeat Functionality
5. Some sites have reported balancing issues with sending CASH to the PMS with POST to All. The change amount is not always sent to the PMS.

---

**Date:** 11/25/2013 16:20 **Product:** 6.37/5.37  
**Exe Version** 5.37/6.37 **Number:** 5092

**Solution:**

1. Improvements for Multi Threading By Channel. In some cases, when one channel is offline (middleware not responding) other channels will fail to process as well.
2. Improvements for specials and the REPEAT button.
3. Improvements for penny rounding and coin dispensers.
4. Improvements for the reference number field in CREDIT transactions when using CC Remote and check related overrings.

---

**Date:** 11/19/2013 11:54 **Product:** 6.38/5.38  
**Exe Version** **Number:** 5093

**Solution:**

1. New "XML only" setting for user defined entries in credit card setup. This setting will restrict all cards from this BIN range to communicate with middleware through spcwin and ability to be entered in UI. Requires new bosetupw.exe.
2. Improvements for teams with more than 10 members.
3. Improvements for sites using "Edit tips at payment" and "PAY" General Message boxes.
4. Improvements for the reference number field in CREDIT transactions when using CC Remote and check related overrings.

## SPCWIN UPDATES BY DATE

Report Number 39

Printed : 12/26/2014 10:33:10

**Date:** 09/19/2013 19:57 **Product:** 6.38/5.38

**Exe Version** 5.38/6.38 **Number:** 5108

- Solution:**
1. Some sites have reported an issue when deleting an item from the check when item is part of Out of Stock and Specials list.
  2. Fix for temp malfunction when creating canceled checks XML output when using FAST ORDER choice from the screen of Unpaid checks and then quitting out of that fast check.
  3. Improvements for Teams and cash to remit. This implements a new user privilege that computes cash to remit that will be useful for server banking (although current math is fine) and for mixed cashier/server banking that sometimes occurs but becomes common when teams are in play.
  4. Improvements for showing all manager discounts on the discount screen after swiping a manager card. Some sites have reported that discounts do not appear as expected.
  5. Some sites have reported an issue for Schedule Requests and the max number of schedule requests being reached.
  6. Fix for occasional issue with splitting a check or recombining checks into one check where cell type 4 as the main item. Some sites have reported the quantity reports as zero, and the item not printing on the check.
  7. Improvements for Specials and Quick Update
  8. Fix for temp malfunction when printing a CC/GC/Loyalty transaction type in French spcwin on various CC receipts
  9. New flag implementation: Time/date in check header only
  10. Monetary label - new 4 character field for monetary label that can be filled with things like "\$" or "GBP" or "EUR"
  11. Improvements for the feature to prevent reuse of CC. Added additional check at submitting CC for the processing to prevent the case of using the same CC card at two terminals almost simultaneously (both cards swiped or manually entered, first submitted for processing, the attempt to submit the second card for processing will be prevented).
  12. The fix for LogicControls (original -- LS3000) KVDU bump bar issue when VDU #3 out of 4 VDUs has stopped registering bump bar buttons.
  13. Fix for the feature of recombining previously separated checks from reopen screen when one or more of the checks had cell type 12 (Discount) applied
  14. Improvements for penny rounding and preset change amount
  15. Some sites have reported KVDUs (based on PC) flashing multiple times after ISC
  16. Improvements for calculating loyalty amount on CC auth screen when going there from payment screen. Some sites have reported that the amount does not factor the tax correctly on the loyalty amount.
  17. Fix for T&A chits with missing employee name
  18. Improvements for PLU and coupons.

**Solution:** Includes the following updates:

02/19/13  
Improvements for calculating the remaining balance on a check when receiving partial authorizations for gift cards.

02/15/13  
improvements for remote processing and Reopen Closed Checks with multiple remote channels in use.

1/30/13

1. Various fixes for Service Charges, including the Service Charge being excluded under certain circumstances and a discrepancy in the check file.
2. Improvements for the option "Fast Order Does Not Print Check" causing check to not auto-reprint when closed.
3. Improvements for CC REPEAT with Remote Transactions.
4. Improvements for Repeat Table and Time printed at check bottom.
